Introductory.

Main Divisions of the Indian Accounts.

The main divisions are:—

- (1) Revenue.
- (2) Capital.
- (3) Debt.
- (4) Remittance.

The first division deals with the proceeds of taxation and other receipts classed as revenue and the expenditure therefrom, the net result of which represents the surplus or deficit which determines the feasibility of reduction, or the necessity for increase, of taxation. The second division deals with expenditure met usually from borrowed funds, such expenditure being incurred with the object either of increasing concrete assets of a material character, or of reducing recurring liabilities, such as those for future pensions by payment of the capitalised value, and also final receipts of a capital nature intended to be applied as a set off to capital expenditure, such as contributions received from Indian States or Railways for Railway construction. The third division comprises receipts and payments in respect of which Government becomes liable to repay the moneys received or has claim to recover the amounts paid, together with repayments of the former and recoveries of the latter. The fourth and last division embraces all merely adjusting heads: under which appear all cash remittances from one treasury to another, besides those which are necessary to accommodate items in transit between different branches of the accounts Department or between the Home Treasury and India. Credits and debits taken to these heads in the first instance are cleared eventually by adjustment under final heads.

It may be explained that the transactions included in these accounts represent mainly the actual cash receipts and disbursements during the financial year April to March, as distinguished from amounts due to or by Government during the same period.

The cash basis system is, however, unsuitable for recording the transactions and presenting at any time the true state of affairs of Government Commercial undertakings which are run on strictly commercial principles. A special accounting procedure has, therefore, been prescribed for these undertakings according to which only such items, as capital invested by Government in the concern and profit or loss arising out of the activities of the concern, which show the financial effect of the undertaking on the Public Accounts, are recorded under the appropriate Revenue or Expenditure major head, while for all other receipts and payments connected with the activities of the undertaking a banking account is kept at the treasury under the head "P.—Deposits and Advances, etc.—Personal Deposits". The detailed accounts of this class of undertaking are maintained outside the regular accounts in the proper commercial form and these accounts are subjected to a suitable audit check by the Indian Audit Department.

Sections and Major Heads of Accounts.

2. Inside each of the four divisions mentioned above, the transactions are grouped into Sections which are further subdivided into the Major Heads of Accounts. The Sections are distinguished by letters of the alphabet, a double letter denoting the capital portion of the particular set of transactions, while the Major Heads are numbered serially, Roman numerals being employed on the receipt side and Arabic on the disbursement side. A complete list of the Sections classified under the four main divisions is appended to this Note. The Major Heads comprised in each Section will be found detailed in the sectional abstract preceding the accounts of the section.

Treasury Balances, Paper Currency Reserve and Gold Standard Reserve.

3. The accounts work from balance to balance, these balances working up to the general cash balances, a small portion of which is kept in the

treasuries all over India while the bulk is deposited with the Imperial Bank of India in India and in the Bank of England in England. Outside these cash balances are the Paper Currency Reserve and the Gold Standard Reserve, the transactions of which appear in the Treasury accounts as deposit transactions only, their balances being kept entirely distinct from the cash balances.

Peculiarities of the Indian Accounts.

4. The Indian Accounts are complicated by reason of their—

(1) covering transactions not only of the Central Government but also of the Provincial Governments, with their separate resources and theoretically separate balances; and

(2) combining transactions in two currencies, rupee and sterling, the exchange relation of which varies from time to time.

The present method of exhibition of the accounts is the outcome of a series of changes which are briefly summarised below.

Summary of changes in the accounts.

5. The changes up to the end of 1878-79 were summarised in a Parliamentary Paper of 1880 which is reproduced below :—

“From the time that the East India Company ceased to be a trading Company, till 1855, the Accounts of the Revenue and Expenditure of British India were presented to Parliament in rupees so far as related to transactions in India, and in pounds for transactions in England, a general abstract being given in which the rupees were converted into sterling money, at the rate of 2s. the sicca rupee (equal to 1s. 10½d. the Company’s rupee), and the final surplus or deficit was stated in pounds sterling. The Accounts showed, on the one side, the net revenue, after deducting from the gross receipts the charges of collection, refunds and drawbacks, allowances and assignments under treaties and allowances to village officers, etc., and on the other side the general charges of administration. Thus, for 1839-40, the Parliamentary Accounts, when the figures are stated in round numbers at the rate now adopted, of 2s. the Company’s or Government rupee, give the revenue as £15 545,000, and the charges at £17,623,000; by transferring to the expenditure side the direct claims on the revenue, the receipts become £20,149,000, and the charges £22,227,000

“The Accounts were presented to Parliament in the old form up to and including those for the year 1853-54. It having been considered, however, that this form called for revision, separate returns were also made in compliance with orders of the House of Commons, for 1851-52, 1852-53, and 1853-54, in which there were statements showing, at the above mentioned rate of exchange, the total income and the total expenditure including in the latter direct claims on the revenue. Statements of net income were also given. In the Accounts of 1854-55 the form of these returns was adopted in place of the old form, rupees being converted into sterling at the exchange of 1s. 10½d. the Company’s rupee

“In 1859 the rate of 2s. for the Government rupee (formerly called the Company’s rupee) was fixed as that to be adopted in the Parliamentary Accounts, (the income and expenditure being thereby *apparently* increased by 1/4th or upwards of £2,000,000); those for 1857-58 and for all subsequent years have been so prepared.

“In the Accounts presented to Parliament for 1859-60, the interest on Guaranteed Railway capital was for the first time shown as a charge on the revenue of the year.

“In 1867-68 the policy of constructing Extraordinary, now called Productive, Works from borrowed money, and excluding the capital charge from the ordinary expenditure of the year, was sanctioned. The amount of this capital outlay is now shown in the Statement of Receipts and Disbursements under a heading of Debt Incurred, or Debt Transferred, for

Productive Public Works, and the interest on that debt is shown as a charge of the year.

"In 1870-71 the system was commenced of allotting to the Provincial Governments grants of money, with the responsibility of meeting therefrom certain charges. In that year the only financial effect was an advance of £200,000 to provide those Governments with a working balance; but in the following years the change affected the accounts in a two-fold manner; certain receipts, estimated at about £650,000, being deducted from the expenditure, both sides of the account were reduced to that extent during the years from 1871-72 to 1875-76, and expenditure to the amount of about £5,000,000 was shown in a single line as 'Allotments for Provincial Services' instead of under the several headings under which it was incurred.

"In the Accounts for 1871-72 statement of net income was abandoned, and the revenue was thenceforward shown only in gross, the direct claims thereon being included in the expenditure.

"In the Accounts for 1876-77 the mode of exhibiting the transactions of the Provincial Governments was altered. Instead of one net sum being charged under Allotments for Provincial Services, the receipts and expenditure were shown (as before 1870-71) under their proper headings, and the difference between the grants and the actual outlay was stated under the head of 'Adjusting Receipts from Provincial Governments (Provincial Deficits)' on the revenue side, or 'Adjusting Payments to Provincial Governments (Provincial Surpluses)' on the expenditure side. These two headings show practically the balance by which the Government of India, as banker for the Provincial Governments, is debtor to, or creditor by, those administrations.

"In the Accounts of the same year, 1876-77 the practice was introduced of showing at the foot of the Abstract of Ordinary Revenue and Expenditure, the annual revenue from Productive Public Works, and the annual charge for interest and working expenses in connection with them. In the case of the State Works which are directly managed by the Government, the whole receipts and charges are shown; in that of the Guaranteed Companies, only the net traffic receipts are given, and the interest, surplus profits, etc., which have to be defrayed from them. Previously, only the net charge upon the revenue in connection with the Guaranteed Companies was shown: by adopting the mode of showing the whole of the net traffic receipts on the one side, and the charge for interest on the other, both sides of the Account were, in 1876-77, increased by £4,705,000.

"In 1877-78, a new heading of Provincial Rates was introduced, under which were entered the receipts from the special taxation imposed on the land in 1877. In 1878-79 a further change was made by bringing into the general account of revenue, chiefly under the head of Provincial Rates, local funds previously accounted for separately, a corresponding charge being entered under various headings on the other side. The increase to both sides of the Account caused by this alteration was about £2,850,000."

6. The changes in the accounts made subsequent to 1878-79 are indicated below. Up to 1879-80 the Provincial and Local Deficits were shown as Revenue, and the Surpluses as Expenditure, of the Government of India; in 1880-81 the Deficits were removed from the Accounts of Revenue, and the total Expenditure chargeable on the revenue of the year was arrived at by adding to or deducting from the Ordinary Expenditure the difference between the Provincial and Local Surpluses and Deficits. In 1881-82 the head 'Gain by Exchange' was removed from the Account of Revenue, and the excess of loss over gain was shown in the Account of Expenditure as "Exchange on Transactions with London." In 1882-83 the gross (instead of the net) receipts of the East Indian Railway were credited to revenue, as in the case of State lines, and the working expenses were included in the expenditure under Productive Public Works. In the Accounts of 1882-83 the General Account also was recast, the Revenue and Expenditure being shown in greater detail than before, other receipts and disbursements being for the most part shown net instead of gross and the transactions in India and England being no longer separated. At the same time, the Accounts

of Revenue and Expenditure were arranged in appropriate groups corresponding to the heads shown in the General Account. Further changes were made in the General Account in 1884-85, the most important of which related to the method of exhibition of exchange. This had previously been shown in lump under the head 'Exchange on transactions with London', which represented roughly the difference between the sterling equivalent of the Indian rupee figures converted at the conventional rate of 2s. and the actual amount received in England through the sale of Council Bills. In the year 1884-85 was introduced the system of distributing exchange over the several Major Heads of revenue and expenditure, with the result that the transactions under each of these heads were shown in tens of rupees (Rx). The Exchange in respect of debt and remittance transactions was, however, shown in lump under a separate head and any difference between the actual exchange and the sum total of the exchange adjusted as above figured in the revenue account under the head 'Exchange' in the 'Miscellaneous' group.

7 In 1899-1900 the 'Rx' system mentioned in the preceding paragraph was abandoned as a result of the rupee having attained stability at 1s. 4d., rupee figures being thenceforth converted at Rs. 15=£1, such trifling differences on account of exchange as occurred being distributed among the Revenue, Capital and Debt Sections of the Account and shown in lump sums except under capital heads. In 1906-07, the Railway transactions were shown *net*, the working expenses being taken in reduction of gross receipts, and certain other changes of a minor character were introduced. In 1907-08, there was a regrouping of Military charges, the Royal Indian Marine and Military Works transactions, till then included with corresponding transactions in the Civil Department, being transferred to the Military Section of the Accounts. From 1920-21 the accounts were prepared on the basis of the rate of 2s per rupee for the conversion of English sterling transactions into rupees, and from 1921-22 the difference between the conventional rate and the average rate of Exchange, *i.e.* the average of the daily Calcutta telegraphic transfer rates on London, was distributed over the several Major Heads of revenue and expenditure. Minor changes of detail were introduced from time to time, among which may be mentioned the unification of the heads 'Posts' and 'Telegraphs' as a result of the amalgamation of the two Departments, the bifurcation of several heads owing to expansion of Departmental activities and the introduction of a separate head for the adjustment of transfers between Imperial and Provincial Governments, till then adjusted by an increase or decrease of the Provincial share of Land Revenue and by a corresponding decrease or increase of the Imperial share.

8 A complete recasting of the Accounts was rendered necessary by the Reforms Scheme and opportunity was then taken to introduce a number of improvements, all of which were given effect in the accounts for the year 1921-22. The major changes are very briefly summarised below:—

- (i) The exhibition of Provincial transactions as a separate entity rendered necessary by the grant of Provincial autonomy, and the consequent re-arrangement of the subsidiary accounts on the basis of Governments instead of areas.
- (ii) The regrouping of the Sections and Major Heads, in which special attention was paid to the more complete exhibition of the transactions of Commercial Departments.
- (iii) The framing of the accounts on a rupee basis, the sterling figures being converted into rupees instead of *vice versa*.

9. Throughout these Accounts, a distinction has been drawn between items relating to Provincial revenues and those relating to the areas in which receipts and payments take place. Thus a column headed by the name of a province alone (*vide* Accounts Nos. 2, 3, 5, 6, 14—16, etc.) is to be taken as referring to a geographical area, while in the heading of a column the entries in which are intended to show the revenues or expenditure of a Province the word 'Government' has been inserted.

In the subsidiary statements the column 'other areas' includes Central transactions in Provincial areas which are not shown separately to avoid undue elaboration.

10. The following changes of importance have been introduced since the year 1922-23 :—

- (i) The opening of new capital Major Heads in the different Sections of the Accounts for the exhibition of expenditure of a capital nature undertaken by Local Governments from borrowed funds.
- (ii) The grouping of all forms of remittance transactions under 'Sec. T—Remittances', that Section being amplified so as to cover all remittances between England and India. The revised method of grouping is shown in the Appendix to this Note.
- (iii) The opening of a new Section "M.—Extraordinary Items", with two Major Heads for the record of special receipts and charges of a non-recurring character, so as to distinguish them from the ordinary revenue and expenditure of Government.
- (iv) The separation of Railway finance from the general finances of the Government of India and the constitution of a Depreciation and a Reserve Fund for Railways. This is more fully described in the general note to the Railway Sections (Sections B. and BB.) of these accounts.
- (v) The introduction of a commercial system of accounts in the Indian Posts and Telegraphs and the Indo-European Telegraph Departments, with a separate Depreciation Fund for each of these Departments. This is fully described in the general note to the Posts and Telegraphs Sections (Sections D. & DD.).
- (vi) The constitution of a Provincial Loans Fund for systematising the arrangement for loans and advances made by the Central Government to the Provincial Governments, involving, *inter alia* the opening of a new Deposit head "Provincial Loans Fund" under Section "P—Deposits and Advances" for the record of transactions in connection with the Fund.
- (vii) The adoption by Government of a debt redemption scheme for the eventual redemption of all debt of the Central Government.
- (viii) As a result of the fixation of the rate of exchange at 1s. 6d. to the rupee with effect from the 1st April 1927, the accounts from 1927-28 have been prepared on the basis of Rs. 13½ to the pound sterling in converting sterling transactions into rupees.
- (ix) The changes in the constitution of the old Famine Insurance Fund, involving the creation of the new Famine Relief Fund to provide, as its main and primary object, for expenditure on Famine Relief proper.
- (x) The institution of a 'Military Reserve Fund' in connection with the scheme for the regulation of the stabilised Military Budget with effect from 1928-29, and the opening, in connection therewith, of two new major heads 'XXVIII-A—Transfers from the Military Reserve Fund' and '50-A—Transfers to the Military Reserve Fund' in the Revenue Section of the accounts, and also of a new Central Ledger head 'Military Reserve Fund' under 'Section P—Deposits and Advances'.
- (xi) The reconstruction on a commercial basis of the accounts of the Lighthouse Administration in India from 1929-30 necessitating the opening of two separate major heads 'XX(I)' and '27(1)—Lighthouses and Lightships' in the revenue section and the capital major head "SE. II—Capital expenditure on Lighthouses and Lightships" in the capital section of the accounts.

APPENDIX.

LIST OF SECTIONS.

I.—Revenue—

A.—Principal heads of Revenue.

AA.—Principal Revenue Heads :—

Forest and other Capital Outlay charged to Revenue.

B.—Railway Revenue Account.

BB.—Railway Capital Outlay charged to Revenue.

C.—Irrigation Revenue Account.

CC.—Irrigation Capital Outlay charged to Revenue.

D.—Posts and Telegraphs Revenue Account.

DD.—Posts and Telegraphs Capital Outlay charged to Revenue.

E.—Debt Services.

F.—Civil Administration.

FF.—Civil Administration. Capital Outlay charged to Revenue.

G.—Currency and Mint.

H.—Civil Works.

HH.—Capital Outlay on Civil Works and Miscellaneous Public Improvements charged to Revenue.

J.—Miscellaneous.

JJ.—Miscellaneous Capital Outlay charged to Revenue.

K.—Military Services.

L.—Contributions and Miscellaneous Adjustments between Central and Provincial Governments.

M.—Extraordinary Items.

II.—Capital—

AA.—Principal Revenue Heads :—

Forest and other Capital Outlay not charged to Revenue.

BB.—Railway Capital Outlay not charged to Revenue.

CC.—Irrigation Capital Outlay not charged to Revenue.

DD.—Posts and Telegraphs Capital Outlay not charged to Revenue.

FF.—Civil Administration—Capital Outlay not charged to Revenue.

GG.—Currency and Mint Capital Outlay not charged to Revenue.

HH.—Capital Outlay on Civil Works and Miscellaneous Public Improvements not charged to Revenue.

JJ.—Miscellaneous Capital Outlay not charged to Revenue.

III.—Debt—

N.—Public Debt.

O.—Unfunded Debt.

P.—Deposits and Advances.

Q.—Loans and Advances by the Central Government.

R.—Loans and Advances by Provincial Governments.

S.—Advances from the Provincial Loans Fund.

IV.—Remittance—

T.—Remittances—

I.—Remittances within India :—

(a) Between treasuries.

(b) Between Provinces or Departments under different audit circles.

II. Remittances between England and India.

(a) Remittance Account.

Purchases and sales of Sterling and other transfers.

(i) Sterling purchased in India.

(ii) Sterling sold in India.

(iii) Sterling taken over in London.

(iv) Transfers through Paper Currency Reserve.

(v) Transfers through Gold Standard Reserve.

Note 1.—The opening and closing balances are shown under the head, 'Cash Balances.'

Note 2.—In an account showing purely Central transactions, an additional adjusting head is necessary for showing the net transactions of Provincial Governments and this is shown under the head 'Balances of Provincial Governments' (*vide* Account No. 7).

GENERAL ACCOUNTS.

	PAGE.
1-A.—GENERAL ACCOUNT OF REVENUE AND EXPENDITURE	2 and 3
1-B. „ „ OF RECEIPTS AND DISBURSEMENTS	4 and 5
2.—ACCOUNT OF REVENUE BY MAJOR HEADS	6 to 11
3. „ OF EXPENDITURE BY MAJOR HEADS	12 to 17

12.—STATEMENT OF VOTED AND NON-VOTED EXPENDITURE OF CENTRAL AND PROVINCIAL GOVERNMENTS	74 to 83

In these Accounts a pound sterling has been taken as the equivalent of $13\frac{1}{2}$ rupees. Had this rate of exchange been realised, the sterling equivalent of any rupee figure would have been found by dividing it by $13\frac{1}{2}$. The average rate of exchange during the year, *i.e.*, the average of the daily telegraphic transfer rates from Calcutta on London, being, however, Rs. 13·4154 per £, the difference between the monthly average rates and the fixed rate of £1 = Rs. $13\frac{1}{2}$ on the sterling transactions has been exhibited against the respective heads under a separate column 'Exchange'. The effect of this adjustment is practically to convert the English sterling figure into rupees at an average instead of at the conventional rate of exchange. The sterling equivalent of the total figure against any head will therefore be obtained approximately by dividing the total rupee figure by the average rate given above.

NOTE.—The formula does not apply to debt and remittance heads, in respect of which no adjustment is made on account of exchange on English transactions finally booked in the Home Account. The sterling equivalent in such case will work out as follows :—

- (1) The Indian rupee figure divided by the average rate, *p. 74*s
- (2) the English sterling figure, *i.e.*, the rupee figure shown in the column "England" divided by $13\frac{1}{2}$

(a) Represents discount written off to Revenue in the year. Under the system of discount adjustment adopted in respect of the 5½ and 4½ per cent. sterling loans, the nominal amounts of debt created were shown in Account No. 82, and the actual cash receipts credited in this Account, the difference representing discount being written off to Revenue by a series of book adjustments extending over the currency of the loans.
(b) Includes Rs. 18,20,444 on account of discount in respect of 4½ per cent. stock issued in November 1922, May 1923, January 1928 and January 1929.

GOVERNMENT in India and in England for the year ended 31st March 1930.

A. and AA.—Principal Revenue Heads, etc.

Sections A and AA.—Principal Revenue Heads and Direct Demand Revenue.

Section A deals with the principal sources of Central and Provincial revenues and the charges in respect of collection and administration thereof. The revenue earned by the Commercial Departments of Railways, Industries, and Posts and Telegraphs is dealt with in separate sections as to those Departments. The arrangement of the heads in this section is in the order of their relative importance as determined by their yield, Central heads being shown first and the Provincial heads thereafter. Tributes from Indian States, though a source of Central revenue, are shown last of all in view of their relative insignificance.

2. Section AA deals with the capital expenditure incurred in Revenue Departments for improvement or development of revenue sources, such as Salt, Forests, etc. It includes the capital major head "52-B-Capital Expenditure on the Security Printing Press" opened in the accounts for 1919 for the record of capital invested in the Security Printing Press established for the manufacture of stamps in India.

Statement of principal sources of ordinary Revenue.

This statement brings out the net revenue for the whole of British India and Burma under the principal sources of ordinary revenue and exhibits the incidence upon each area of 1,000 square miles and each 1,000 of population.

2. It includes all the heads under "Principal Heads of Revenue", except "Opium" and "Tributes from Indian States" which are not taken into account as the receipts thereunder do not accrue from either direct or indirect taxation.

3. In this statement, Burma is treated separately, as it is a self-contained province and is out of India. In the case of other provinces, the Salt and the Customs figures are shown in lump for the whole of India, as the revenue brought to account under these heads in each province does not represent the collections from the people of that province only. Salt revenue is realised in the provinces in which salt is manufactured or into which it is first imported and Customs revenue is collected mainly in the seaport towns, but the taxes so levied are met by the consuming public in the whole of India.

4. The receipts shown under each head represent *net* collections after deduction of refunds. Assignments of Land Revenue, and Salt, Excise and other compensations paid for resumption of revenue rights by Government, as well as allowances to district and village officers for collection of land revenue which are really of the nature of refunds of revenue, are also deducted from the total receipts so as to deduce the *net* revenue under each head.

I and 1—Customs.

REVENUE.

The Revenue under this head includes, in addition to Customs duties proper, certain *excise* duties levied on motor spirit and kerosene, the head 'Excise' being restricted in the Government accounts mainly to the duties levied on drugs and intoxicants produced in the country. On the other hand, the customs duty on salt is credited not to the head 'Customs' but to 'Salt', along with the excise duty thereon which that duty is intended to counter-vail. It may be mentioned that duty on the importation of foreign liquors is credited as 'Customs' revenue, while license duty for sale of foreign liquors is treated as 'Excise'.

With effect from the 28th February 1929, both the excise and import duties on motor spirit have been raised from four to six annas *per* gallon, the additional revenue being earmarked for credit to a Road Development Fund, from which grants will be made to Provincial Governments and others for expenditure on the development of roads (See Account No. 89-B.).

2. The great bulk of the Customs revenue is made up of:—

(a) Import Duties

(b) Export Duties,

the duties being credited under two distinct sub-heads in the accounts, 'Sea Customs' and 'Land Customs'. The latter class consists of duty levied on exports or imports by land between 'foreign territory' as defined in section 5 of the Indian Tariff Act, 1894, and British India, and forms but a comparatively small fraction of the total revenue.

3. The various articles on which duties were levied during 1929-30 are set forth in Account No. 14, together with the gross yield of each and the *net* yield after deducting the refunds and drawbacks. The normal rate of import duty levied during 1929-30 was 15 per cent. *ad valorem*, though certain articles were taxed at lower and others at special higher rates. For the complete schedule of tariff duties levied during 1929-30, see Schedules II and III to the Indian Tariff Act, 1894, as subsequently amended.

EXPENDITURE.

4. The charges incurred are almost wholly on account of establishments engaged in the collection of revenue. In Bombay, besides the Customs staff proper, there is a combined Salt and Customs establishment, but its entire cost is now charged to 'Salt'.

II and 2—Taxes on Income.

REVENUE.

The taxes on income are of two kinds :—

(1) Income Tax.

(2) Super Tax.

During 1929-30 Income Tax was charged on a graduated scale of 5 to 18 pies in the rupee, the latter rate being payable on total annual incomes of Rs. 40,000 or upwards. In the case of companies, registered firms and interest on securities, the tax was levied at the maximum rate. Annual incomes of less than Rs. 2,000 are not liable to the tax, except in the case of companies, registered firms and interest on securities, which are taxed whatever the annual total income may be, but refunds are admissible under section 48 of the Indian Income Tax Act to shareholders of companies, partners of registered firms and holders of securities, the refund being fixed with reference to the rate at which they are personally liable.

2. Super Tax is payable in addition to Income Tax and is levied on a graduated and ascending scale on so much of the income as is in excess of Rs. 50,000 per annum. The rates of tax levied during 1929-30 varied from one anna to six annas in the rupee. In the case of a Hindu undivided family, the Super Tax is, however, levied on so much of the income as is in excess of Rs. 75,000, while in the case of companies it is levied at a flat rate of one anna. For complete schedules of the rates of Income Tax and Super Tax in force during 1929-30, see Schedule II to the Indian Finance Act of 1929.

3 The Excess Profits Duty Act, 1919, was in force for one year only, viz., 1919-20. The transactions exhibited under this head in the accounts for 1929-30 represent collections of arrears of revenue.

Share of Provincial Governments.

4. Under Rule 15 of the Devolution Rules as it stands at present, whenever the assessed income of any year of any province exceeds the assessed income of 1920-21, the Local Government of that province is credited with an amount calculated at three pies in each rupee of the amount of such excess. The entire revenue of the Central Government appears under this head, the share allocated to Provincial Governments being credited to the corresponding head in the Provincial Section of the accounts.

EXPENDITURE

5. The charges shown under this head relate chiefly to the establishments employed on the collection and assessment of the taxes. In certain districts of two Provinces this work is performed by the ordinary District Establishments. Local Governments are paid 10 per cent of net collections of income-tax, excluding tax on Government salaries and interest on Government securities, in areas or districts where the assessment and collection are done by their revenue staff, after deducting the cost of special Income Tax staff, if any, in the areas, the latter being, since 1922-23, a charge on the Central Government.

III and 3—Salt.**REVENUE.**

Salt revenue is derived from three principal sources, *viz.* :—

- (1) Excise duty on Indian salt.
- (2) Customs duty on imported salt.
- (3) Sale of Government salt.

Salt is manufactured in India both by Government, either directly or indirectly, and by private persons. In the case of the former, the work is carried on either by Government, as in the case of the Northern India Salt sources (principally Sambhar Lake in Rajputana and salt mines at Khewra), or by private agency under Government supervision as in Madras and Bombay. Where the salt is produced by private agency, it is purchased by Government to be sold subsequently to the traders. In the case of private salt works which exist in Madras, Bombay and Burma, Government supervises the manufacture and collects excise duty on all the salt produced.

The rate of customs duty on foreign and the excise duty on Indian salt is Rs. 1 4 0 per maund (of 82 lbs.) all round, with the exception of a few districts of Burma and Aden, where a composition system is in force. No duty is levied on salt imported from Tibet into Kumaon. In the accounts, the sale proceeds of salt manufactured at the Government works are credited as a distinct item, the excise duty being credited under a separate head.

EXPENDITURE.

2. The expenditure in the Northern India Salt Revenue Department is classified into the following main divisions :—

- (1) Working Expenses.
- (2) Preventive Establishment.
- (3) Salt Compensations to Indian States, etc.
- (4) Interest on Capital.
- (5) Capital Expenditure.

A system of accounts based on commercial principles has been introduced in the Manufacturing Branch of the Northern India Salt Revenue Department with effect from the 1st April 1924. A Depreciation Fund has been created for renewal and replacement of wasting assets of the Department, the annual contribution to the Fund being charged to Working Expenses. The department is further charged with interest on Capital Outlay and other items of indirect charges such as the cost of audit and accounts, pensionary charges, etc., which are necessarily included in the Working Expenses to bring out the true commercial profit or loss on the working of the Department. The accounts in commercial form appear annually in the Appendix to the Appropriation accounts of the Central Government (Civil) containing accounts and reviews of the Government commercial concerns.

Salt Compensation consists of payments, mostly to Indian States in Rajputana, for the cession to Government of rights in connection with this source of revenue. A portion of these payments is debited to the Working Expenses of the Department.

The whole of the capital expenditure in the Northern India Salt Revenue Department is met out of Revenue—*vide* paragraph 4 below.

3. The main items of Salt expenditure in Provincial areas are :—

- (1) Cost of salt purchased by Government.
- (2) Cost of administrative and preventive establishments.
- (3) Works.
- (4) Salt Compensations.

A. and AA.—Principal Revenue Heads, etc.

The first of these occurs in Madras and Bombay where, as stated in paragraph 1 above, the salt produced in Government Works run by private agency is purchased by Government. In some provinces there are combined Salt and Excise establishments, the charges for which are distributed in proportionate shares between the heads concerned.

Head (3) records expenditure on extension and improvement of the Pritchard Salt Works in Bombay, Excise-Licensees works in Madras and other petty works for manufacture and storage of salt.

The Salt Accounts in Provincial areas have not yet been placed on a commercial footing

3-A.—CAPITAL OUTLAY ON SALT WORKS (CHARGED TO REVENUE).

CAPITAL EXPENDITURE.

4. This major head records the capital outlay on the Northern India Salt Revenue Department. The details of expenditure are shown in Account No. 16-C.

5. In respect of the expenditure under the head "D.—Bags", it may be explained that a large quantity of bags is stocked by the Northern India Salt Revenue Department for issue to traders on payment, and both the cost of bags and the recoveries therefor are taken to the Capital Account. Thus the amount that remains finally charged to Capital Account represents the cost of bags in stock.

IV and 4—Opium.

REVENUE.

Opium is produced under Government supervision in the United Provinces and under special arrangements in the Central India, Rajputana and Gwalior States, and is bought in its crude condition from the cultivators in the United Provinces and from the Durbars of the States concerned by Government at fixed rates. It is then made up in the Government factory at Ghazipur into three different forms: (1) for sale to foreign and colonial Governments, known as provision opium; (2) for consumption in India, known as excise opium; and (3) for medicinal use, known as medical opium.

2. The opium thus manufactured is disposed of by Government in the following ways:—

- | | | |
|---|---|--------------------|
| (a) By direct sales to the Governments of the Straits Settlements, Hongkong, the Netherlands Indies, Siam, British North Borneo, Sarawak, French Indo-China and Ceylon, with which agreements have been made for supply at fixed rates. | } | Provision
opium |
| (b) By issue to the Excise Department in India for local consumption under revenue regulations. | } | Excise
opium. |
| (c) By supply to the Medical Department in India for medical purposes and by export to the United Kingdom for sale to chemists. | } | Medical
opium |

As regards (b), it may be explained that, prior to 1925-26, the issue price of excise opium to licenced vendors was fixed by the various Local Governments and, out of the gross sale proceeds, a sum fixed by the Government of India was credited to 'Opium' and the balance treated as 'Excise' revenue. From the year 1925-26, it has been decided that the Provincial Governments shall pay the Government of India for all opium sold to the Excise Department as soon as it is delivered from the Ghazipur Factory. Consequently the value of opium so supplied is credited directly to "IV—Opium" by debit to Provincial Governments under "6—Excise", the subsequent sale-proceeds of opium in the Excise Department being credited to Provincial Governments as Excise Revenue.

EXPENDITURE.

The expenditure of the Opium Department relates to (i) the supervision by Government of the cultivation of the poppy, (ii) the purchase of crude opium from the cultivators in the United Provinces and from the Durbars of the Indian States, (iii) its manufacture into the finished product, and the packing and despatch thereof at the Ghazipur Factory, and (iv) its final storage and disposal. The majority of these operations was formerly carried on under the general control of the Government of the United Provinces working through the Opium Agent. Since 1st April 1926, the control of the Opium Department has been taken over by the Government of India themselves. Besides the above, certain payments are made to Indian States in Bombay and to the French Government as compensation for cessation of rights in connection with opium.

2. A new system of accounts based on commercial principles of costing has been introduced in the Opium Department, and the price charged for opium supplied to Provincial Governments is based on the costs so deduced. For facility of accounting, all opium transactions are brought to account on the books of the United Provinces. The accounts in commercial form appear annually in the Appendix to the Appropriation Accounts of the Central Government (Civil) containing accounts and reviews of Government commercial concerns.

(a) Adjusted in India General Books.

A. and AA.—Principal Revenue Heads, etc.

V and 5—Land Revenue.

REVENUE.

'Land Revenue' and 'Taxes on Income' are the complement of each other, the former being a levy on agricultural incomes and the latter on industrial or professional incomes.

2. It is impossible in a note of this kind to give any sketch of the various land revenue systems in India. Any adequate description would require a complete volume.

3. In several provinces, the charges for the supply of water from Irrigation canals are consolidated with the land revenue demand. The consolidated rates are in the first instance credited to 'Land Revenue' and an approximate amount calculated as the share due to Irrigation is then transferred to Irrigation Revenue heads, (*vide* deduct entries at foot of Account No. 18). Where a separate water rate is levied, it is credited direct to the Irrigation head.

4. The Land Revenue figures include certain book credits shown under the head 'Assessment of Alienated Lands *less* Quit-rents' in Account No. 18, the *per contra* debits being brought to account under the expenditure heads 'Land Revenue', 'General Administration' and 'Police'. They represent assessments (*less* quit-rents) of lands alienated to inamdars and other grantees or to village officials as remuneration for service rendered. The quit-rents on these alienated lands are collected and credited as 'Ordinary Land Revenue'.

5. The comparatively insignificant amounts credited prior to 1921-22 under the separate head 'Provincial Rates' are now included under 'Land Revenue'.

EXPENDITURE.

6. The charges shown under the head 'Charges of Administration' relate chiefly to establishments employed on the collection or administration of Land Revenue. The bulk of the expenditure on District Officers and their establishments, which prior to 1921-22 was divided between this head and 'Administration of Justice,' is now recorded along with the charges of headquarters administration under the head 'General Administration.' It has been recognised that this method of apportionment of the charges of district administration gives an incorrect view of the cost of collection of Land Revenue and produces widely divergent results between province and province. The question of evolving a more scientific method of distribution has therefore been under consideration, but no definite change in the existing method is likely to be made until the result of the Report of the Statutory Commission is known.

7. The charges connected with survey and settlement and the maintenance of survey and other land records form the bulk of the expenditure under this major head. The Survey charges represent the cost of surveys undertaken solely for revenue purposes. The cost of topographical survey carried out by the Survey of India Department is debited under the head "30—Scientific Departments".

8. Of the charges directly connected with the collection of land revenue, the most important are the allowances to district and village officers. In some Provinces, notably Bombay, the village officers are remunerated by the grant of rent free lands, the assessment of which is adjusted as land revenue by book debit under the expenditure head as explained in paragraph 4 above. Allowances to district and village officers in Madras, Bombay and the Central Provinces, which were formerly charged under "5—Land Revenue", are now taken to "22—General Administration".

9. Finally, there are the charges connected with land revenue assignments and compensations. The former consist chiefly of alienations of revenue to inamdars and other grantees, while the latter comprise pensions granted in lieu of resumed lands, malikana or allowances to excluded proprietors and other minor charges. Prior to 1921-22 these charges were recorded under a separate Major head "Assignments and Compensations".

(f) Includes expenditure on account of "Fishery Survey" which is "Transferred."
(g) Excludes Rs. 508 adjusted under "47—Miscellaneous" in the United Provinces.

g) Excludes Rs. 608 adjusted under "47—Miscellaneous" in the United Provinces.

A. and AA.—Principal Revenue Heads, etc.

VI and 6—Excise.**REVENUE.**

As explained in the note under the head 'Customs', the term 'Excise' in the Government Accounts is applied mainly to the taxation imposed on drugs and intoxicants produced in the country. The excise duty on motor spirits is credited to 'Customs', while the excise duty on Indian salt is taken to 'Salt'. Under the head 'Excise' is recorded the revenue from the excise duty on the consumption in India of alcoholic liquors, opium and drugs prepared from hemp and coca plants and synthetic productions. Some excise revenue is also derived from the sale of *Vend* licenses for sale of imported liquor and licenses for bottling it and other similar operations. The duty on the importation of liquor from abroad is regulated in accordance with the Customs tariff in force, and credited as a receipt under 'Customs'.

EXPENDITURE.

The expenditure consists mainly of the outlay on the establishment engaged in the collection of excise revenue and of the cost price of opium supplied to the Excise Department by the Opium Department. A share of the combined Salt and Excise establishments, where such establishments are maintained, is also debited to this head.

XXXIII.—Receipts in aid of superannuation.

VII and 7—Stamps.**REVENUE.**

Judicial Stamps are used to denote the payment of the duties imposed on Judicial instruments by the Indian Court-Fees Act of 1870. All other stamps used to denote the payment of duty, *e.g.*, on leases and mortgages, bills of lading and bills of exchange, are governed by the Indian Stamp Act of 1899 and are termed 'Non-Judicial' Stamps.

2 Unified stamps of the denominations of one half anna, one anna, two annas and four annas are sold at Post Offices and may be used for revenue as well as for Postal and Telegraph purposes. The sale-proceeds of these stamps are credited under the head 'XV.—Posts and Telegraphs', but an annual adjustment is made by crediting to 'Stamps A.—Non-Judicial' a lump sum in each province to represent its share of the proceeds. The lump sums so credited represent the estimated *net* profits of the sales, the cost price of the stamps being deducted from their proceeds. Prior to 1926-27, the total amount so adjusted for all provinces was Rs. 19,00,800, which was arrived at by a calculation of the average sale of stamps of the required denominations in years immediately preceding the introduction of unified stamps. The amount has been fixed at Rs. 47.87,300, from 1st April, 1927; and this amount, after allowing for a readjustment of Rs. 30.100 on account of excess debits to Posts and Telegraphs in the accounts of previous years, has been adjusted in the accounts for 1929-30 by reduction of receipts of the Posts and Telegraphs Department, *vide* Account No. 40-F, page 276. Out of this amount a sum of Rs. 9,300 is payable to certain Local Funds in Madras and the balance is distributed over all provinces and included under 'Sale of Non-Judicial Stamps'; see Account No. 20.

EXPENDITURE.

3. Stamps charges consist mainly of the cost price of stamps and the expenditure incurred upon agencies employed in selling them. Formerly the bulk of the expenditure was incurred in England where the stamps were manufactured. A Security Printing Press with a Central Stamp Store attached has now been established at Nasik Road where the printing of stamps has been carried on since November 1925. The accounts of the Press have been placed on a commercial basis from the 1st April 1926, see Account No. 20-B.

4. The work of the former Central Stamp Store at Calcutta has been taken over by the Central Stamp Store at Nasik. Local Governments get their supplies from this Store, the cost of the supplies being credited in the commercial accounts of the Security Printing Press.

5. With effect from the year 1929-30, the transactions in connection with the purchase and sale of plain paper used with stamps are being brought to account under the head 'Stationery and Printing'.

CAPITAL EXPENDITURE.**52-B.—Capital expenditure on the Security Printing Press.**

6. The accounts of the Press are, with effect from 1st April 1926, being maintained in accordance with the special accounting procedure prescribed for Government Commercial Undertakings, which is explained in paragraph 1 of the introductory note on page XI. According to this procedure, the sums invested by Government in the Press have been shown as capital invested in a commercial undertaking, while the profit or loss arising out of it is shown in Account No. 20 or 20-A, as the case may be. Annual accounts in commercial form appear in the Appendix to the Appropriation Accounts of the Central Government (Civil) containing accounts and reviews of Government commercial concerns.

EXPENDITURE—*contd.*

7. The Capital Outlay on the construction of the Central Stamp Store at Nasik Road, which was previously recorded under the Capital major head "7-A—Capital Expenditure on Central Stamp Store", has since been transferred to this head, this Store being now worked as an integral part of the Security Printing Press.

Total	22,754	48,28,058
Deduct—Expenditure charged to Ordinary Revenues	29,68,720
Net Expenditure not charged to Revenue	22,754	18,59,338

(a) Includes capital outlay on the construction of Central Stamp store at Nasik Road, which has been transferred to this head in 1930-30.

VIII and 8—Forest.**REVENUE.**

Revenue from Forests may be divided into three main classes :—

(1) Produce of Government forests.

(2) Revenue from forests not managed by Government.

This consists of duty on foreign timber and other forest produce, together with revenue from shared and private forests.

(3) Miscellaneous

The chief item under this head is the proceeds of the sale of confiscated drift and waif wood.

The principal source of revenue is the sale of timber and other produce of Government forests.

EXPENDITURE CHARGED TO REVENUE.

2. The expenditure falls under two main heads:—

(1) Conservancy, maintenance and regeneration.

(2) Establishments.

Revenue expenditure includes, besides working expenses incurred on the production of revenue and on the realisation thereof, all charges that are necessary for the maintenance of forests (after they have commenced to yield revenue) up to a proper standard of efficiency; that is to say, the cost of all operations in connection with the conservation and regeneration of forests, including the replacing of forest crops by artificial means after harvesting, which may be required from year to year to maintain the forest in a state of normal efficiency.

3. The head 'Interest on Capital' records the interest on Forest capital outlay charged to the head "52-A—Capital Outlay on Forests not charged to Revenue",—see paragraph 4 below.

CAPITAL EXPENDITURE.

52-A.—Capital Outlay on Forests not charged to Revenue.

8-A.—Capital Outlay on Forests charged to Revenue.

4. These capital major heads have been opened in the accounts for the exhibition of capital outlay on Forests. All expenditure of a capital nature in the Forest Department is recorded in the first place under the head 52-A—Capital Outlay on Forests' outside the revenue account, and any expenditure which the Local Government may decide to meet from revenue is deducted from the total expenditure recorded under this head and transferred to the head "8-A—Capital Outlay on Forests" within the revenue section of the account. The same principle has been applied to the Forest expenditure of the Central Government also.

(b) Includes Rs. 6,564 on account of expenditure in Burma and Travels, which is reserved.

(a) Vide Note (c) on page 120.

IX and 9—Registration.

The revenue under this head is derived from fees levied on the registration of documents. The work of the Department is to be regarded more as a convenience to the public and to Government than as a means of providing the administration with funds, as the bulk of the revenue is expended on the cost of administration.

IX A and 9 A—Scheduled Taxes.

These heads were opened for the first time in the accounts for 1922-23. They record the transactions relating to taxes imposed by Provincial Governments under the Scheduled Taxes Rules. If, however, a new Scheduled Tax takes the form of an extension of existing methods of taxation, such as a registration fee or a stamp duty, the additional receipts are recorded under the major heads of revenue concerned and not under this head.

2. The cost of collection of a Scheduled Tax, where a separate agency has not been appointed for the purpose, is adjusted under the ordinary major heads. Only the cost of special establishment, if any, employed on the collection of these taxes is debited to "9-A—Scheduled Taxes".

X.—Tributes from Indian States.

The revenue recorded under this head represents tributes received from the protected States, in several cases as a result of exchanges of territory and settlement of claims, and contributions made chiefly in lieu of former obligations to supply or maintain troops.

Tributes from the Shan States in Burma which prior to 1921-22 were recorded under this head, are now credited to "Land Revenue".

No. 23.—DETAILED ACCOUNT of TRIBUTES and CONTRIBUTIONS from INDIAN STATES
for the Year ended 31st March 1930 -- *concl'd.*

Sections B. & B B.—Railway Capital and Revenue Accounts.

GENERAL NOTE.

The main scheme of these accounts is designed to show:—

- (a) The Capital at Charge of each railway (Account No. 24).
- (b) The net Working Receipts, comprising the gross receipts less the expenses of working (Account No. 27).
- (c) The percentage of (b) on (a) (Account No. 24).
- (d) The outgoings in the shape of shares of Surplus Profits paid to the Working Companies and Interest Charges on the capital expended (Accounts Nos. 24 and 28).
- (e) The net gain or loss to Government (Account No. 24).
- (f) The percentage of (e) on (a) (Account No. 24).
- (g) The contributions to General Revenues and the Railway Reserve Fund (Account No. 24A).
- (h) The balance in hand of the Depreciation and Reserve Funds (Accounts Nos. 27B and 27C).

2. Indian railways have been constructed either by the State or by private Companies. On completion of construction, they have been worked either by the State or by the Company which originally built them, or have been handed over to another Company to work. Several of the railways originally owned by Companies have been purchased by the State. Some of these purchased railways are now worked by the State; for example, the Sind, Punjab and Delhi Section of the North Western Railway. Some of them, as in the case of the Bombay, Baroda and Central India Railway, have been handed back to be worked by the Company which originally constructed them. Some on purchase have been handed over to other railways to work under contract; thus, parts of the old Madras Railway were handed over to the Madras and Southern Mahratta and South Indian Railways to work. The Nagda-Muttra Railway was built by the State, but has since been incorporated in the Bombay, Baroda and Central India Railway and is worked by that Company as a part of its system. The Delhi-Umbala-Kalka and the Southern Punjab Railways, which were built by companies, have since been purchased by the State and are worked by the North-Western Railway.

3. The East Coast Railway was originally constructed and worked by Government as a famine-protective line, but its northern and southern sections were subsequently made over to the Bengal-Nagpur and Madras Railway Companies, respectively, to work as part of their systems. The Hyderabad-Jodhpur Frontier Section of the Jodhpur Railway was constructed by Government and handed over for working to the Jodhpur Railway which belongs entirely to an Indian State. The Bezwada Extension is in the same way worked by the Nizam's Guaranteed State Railway Company. The terms on which one railway works another are in all cases, except where a purchased railway has been absorbed entirely in a State Railway system, incorporated in a contract. Hardly two of these contracts are alike in every respect. It is impossible to set out in these accounts the differences arising out of the varying terms of the contracts, or to take account in every case of the histories of the railways since construction.

4. It may be noted, in the first place, that no railway is entered in these accounts unless Government has at the present moment some immediate interest in it, either by the receipt of money from it or the expenditure of money upon it. Railways which are actually included in these accounts fall under two main categories:—

- (a) those in which Government has a capital interest,
- (b) those in which it has not.

5. The second class comprises for the most part the branch line companies formed before the introduction of the present policy of financing

branch lines enunciated in paragraph 7 *infra*. Generally, the main financial conditions of the contracts with such Companies are—

- (1) the provision of land by Government free of cost to the Companies;
- (2) financial assistance in the shape of a firm guarantee of $3\frac{1}{2}$ per cent. on the capital, or a rebate out of the net receipts of the parent system accruing from "interchanged traffic", sufficient to make up, with the net earnings of the Branch, an amount equivalent to 5 per cent. on the capital; and
- (3) equal division between Government and the Branch line company of surplus profits over and above 5 per cent.

6. A number of small railways in India have been constructed by Companies on these terms. The financing of such railways falls outside the Government programme of railway construction, the capital transactions appearing in the accounts representing merely the receipt and payment of deposits (*vide* Account No. 90). The value of land is charged to Government as Railway Revenue expenditure outside the accounts of the Company (*vide* Account No. 30). Similarly the Government share of the Surplus Profits of the Railway in excess of 5 per cent. is credited as a Revenue receipt (*vide* Account No. 29). In each case in which Government gives a direct guarantee, there is a liability in respect of interest, and if Government were to make a payment under this liability it would figure in the accounts as Government expenditure on the railway (*vide* Account No. 30).

7. A new policy was introduced in 1924-25 for the construction and financing of branch lines. Under this policy endeavours are to be made to reduce by purchase the number of existing branch line companies and Government is to find the capital required for the construction of extensions of branches to existing main systems. The construction of any branch or feeder lines not expected to be remunerative, which a Local Government might desire to have constructed for purely local reasons or administrative advantages, will be considered, provided the Local Government is prepared to guarantee the Government of India against the loss involved in the working of such lines.

8. The State has much greater immediate interest in those railways the capital expenditure on which has been provided wholly or mainly by Government. The main divisions of these railways are:—

A.—State Railways worked by the State.

B.—State Railways worked by Companies or by Indian States.

The second class comprises Railways towards the cost of which the working agents have contributed a small amount of share capital on which a definite rate of interest is guaranteed by Government and in respect of which they receive a share of the surplus profits after meeting all charges for interest on capital.

Both classes have been financed in the same way, through the Government programme, the funds for which are usually provided either from surplus revenues, or from loans forming part of the Public Debt of India, or from Debentures and Debenture Stock raised by the Working Companies.

9. The scheme for the separation of Railway finances from the general finances of the Government of India was brought into force with effect from 1924-25. The main features of this scheme are—

- (1) a definite annual contribution from railways to Central Revenues calculated with reference to the capital at charge and the profits realised;
- (2) the establishment of a Reserve and a Depreciation Fund for Railways.

10. In the statements below, some railways are printed as an inset below others. This means that the Railway shown at the head is the main system which works the other subsidiary railways shown as an inset below it. Thus the Coonoor-Ootacamund and Tinnevely-Quilon Railways are worked by the South Indian Railway.

B. and BB.—Railway Capital and Revenue Accounts.

ACCOUNT No. 24.

Statement of Net Revenue Receipts of State Railways for 1929-30, and of the percentage of those figures on the Capital at Charge on 31st March 1930; also of the net gain or loss to Government after meeting all charges against the Net Revenue Receipts.

This is the main account and all that follow work up to it, though they may contain information which is important for other reasons. It brings together the capital at charge of each railway which is financed by Government and the net revenue receipts of the year, and from these deduces the percentage return of the net revenue receipts on the capital at charge.

The final net gain or loss to Government on the financial results of the year's working is then worked out for each railway. For this purpose, it is necessary to deduct certain payments made by Government in the shape of the shares of surplus profits and of net revenue receipts payable to the Working Companies or Indian States under their contracts; and when these and the interest charges have been deducted, the result is the net gain or loss so far as that particular railway is concerned.

2. It is not possible to devise any statement which would set out systematically the calculations working up to the shares of surplus profits payable to the Companies (column 5), as the terms of the contracts vary greatly, but full details of the interest charges (column 6) will be found in the subsidiary Statements Nos. 28 and 28-A.

3. In arriving at the percentage return on the capital at charge of railways as a whole, the outlay on projects which have been abandoned has necessarily to be added to the total capital outlay. Similarly, in arriving at the final net gain or loss for all railways, or the contribution to general revenues, certain miscellaneous receipts and payments relating to subsidised railways and other miscellaneous railway expenditure, such as on surveys, have to be added to or deducted from the net gain or loss calculated for State Railways. The necessary addition or deduction is made at the foot of the statement

No. 24.—STATEMENT of NET REVENUE RECEIPTS of STATE RAILWAYS for 1929-30, and of the percentage of those figures on the Capital at Charge on 31st March 1930 ; also of the net gain or loss to Government after meeting all charges against the Net Revenue Receipts.

ACCOUNT No. 24 A.

Statement of Contribution to General Revenues and amounts accruing to Railway Reserve Fund.

This account sets out in detail the method of calculation adopted for arriving at the amount contributed to General Revenues and to the Railway Reserve Fund. The main points underlying the payment of this contribution and the constitution of the Reserve Fund are :—

- (1) In consideration of the railway finances being separated from the general finances of the country, the general revenues receive a definite annual contribution from railways which is the first charge on the net receipts of railways.
- (2) The contribution is based on the capital at charge and working results of Commercial Lines, and is a sum equal to one per cent. on the capital at charge of Commercial Lines (excluding capital contributed by Companies and Indian States) at the end of the financial year next but one preceding, *plus* one-fifth of any surplus profits remaining after payment of this fixed return; subject to the condition that, if in any year Railway Revenues are insufficient to provide the percentage of one per cent. on the capital at charge, surplus profits in the next or subsequent years will not be deemed to have accrued for purposes of division until such deficiency has been made good. The interest on the capital at charge of, and the loss in working, Strategic Lines are borne by general revenues and are consequently deducted from the contribution so calculated in order to arrive at the amount payable from railway to general revenues each year.
- (3) Any surplus remaining after this payment to general revenues is transferred to a Railway Reserve; provided that, if the amount available for transfer to the Railway Reserve exceeds in any one year three crores of rupees, two-thirds only of the excess over 3 crores are transferred to the Railway Reserve and the remaining one-third accrues to general revenues.

24-A.—STATEMENT showing calculation of CONTRIBUTION TO GENERAL REVENUES and amount accruing to RAILWAY RESERVE FUND during the year 1929-30.

ACCOUNT No. 25.

Statement of Capital expenditure on the Construction and Purchase of Railways during and to end of the year 1929-1930.

This account sets out in detail the capital expended on the construction of Railways from funds provided in the Railway Programme, whether on the direct responsibility of Government or against capital contributed by Companies and Indian States, and to this is added the expenditure separately met from Central and Provincial Revenues, working to the total construction expenditure on Railways. Finally it deduces the capital at charge of each Railway, on which the percentage of the return of net Revenue Receipts shown in Account No. 24 (page 145) is calculated.

2. Every year a programme of capital expenditure is sanctioned, and this statement shows the actual expenditure incurred against the amount so sanctioned.

3 Most of the money required for capital expenditure has been obtained by Government by loans in the open market but, with the exception of a certain amount of specific railway debt, no distinction has been made in the accounts between loans raised by the Secretary of State or by the Government of India for railway purposes and for the ordinary purposes of Government.

4. In the early days of railway construction in India, a large part of the productive expenditure on railways was met directly from surplus revenues. It became evident, however, that a revenue surplus would be more properly applied to the redemption or avoidance of unproductive debt, and the present policy of Government is to raise large loans for productive outlay on Railways while paying off out of revenue as much as possible of the unproductive debt. It is economically unsound to pay off old unproductive loans with one hand while contracting new productive loans with the other. Instead, therefore, of employing the funds available from revenue upon the redemption of old unproductive debt, these funds have been devoted to railway construction and an equivalent amount has been transferred in the accounts from unproductive to productive debt. Under this principle the amount of the unproductive debt has been decreased by the amount which was expended out of Revenue on railways in the early years (see Note on Public Debt, page 614).

5. A portion of the outlay on State Railways has been met from Share Capital, Debentures and Debenture Stock raised by the Working Companies under the provisions of their respective contracts and also from contributions made by Indian States. Details of the amounts so contributed will be found in subsidiary Account No. 25-A.

6. Another source of funds for capital expenditure has been the Famine Insurance Grant. Since the accounts for 1921-22 however, no distinction is observed in the accounts between outlay charged to Revenue on different accounts (See also Note on Famine Relief, page 465)

7. Many of the more important railways have been purchased by Government from the Companies which originally constructed them, and in respect of these the liability incurred by Government in connection with the purchase, as reduced from year to year by the operation of the various Sinking Funds, has to be added to the total construction expenditure in order to arrive at the total capital at charge.

8 The manner in which Government has purchased the more important Railways is set forth in a subsidiary Statement No. 25-B, which gives details of the original liability and the amounts redeemed by Annuity and Sinking Fund payments to the end of 1923-24. The payments on account of Annuity are really of a composite character. The portion which represents payment of interest is clearly of a revenue nature, whilst the remaining portion, as well as the payments on account of Sinking Fund, represent true cancellation of debt and thus partake of a capital nature. In practice, however, the

total payments on account of Annuity and Sinking Funds have up to 1923-24 been met from current revenues, and, this being so, it is only right that the cancellation effected by the operation of these funds should be treated as an immediate reduction of liability in arriving at the true capital at charge.

9. With the separation of Railway from General finances with effect from 1924-25, the Railway Capital Account was permanently debited with the balance on 31st March 1924 of the capital liability involved in the purchase of Railways under redemption by Annuities and Sinking Funds. As a consequence of this arrangement, the Railway Revenue Account is charged with the full interest on the liability outstanding on 31st March 1924, and the balance required to make up the total annuity payments and the sinking fund charges is borne by general revenues.

10. As an exception to this arrangement, the charges for the Discount Sinking Fund for the Oudh and Rohilkund Railway, created for the redemption of debt incurred in excess of the liability involved in the purchase of the Railway, are still debitable to the Railway Revenue Account.

11. The capital liability under redemption by Annuities not redeemed to the end of 31st March 1924 has been added to Public Debt and recorded in Section N-Account No. 82 under the heading "Railway Annuities" as a separate division of that debt. It will be gradually reduced as the Annuities are paid off year by year.

(a) Includes Rs. 62,80,443 on account of outlay on Tanjore District Board Railway and Rs. 6,77,170 on account of Sulliamangalam Salem Railway brought into the account without financial adjustment.

ACCOUNT No. 25 B.*Statement of the Liability involved in the Purchase on the State of the Capital of the old Guaranteed Railway Companies.*

This account sets forth statistically in detail the manner in which the purchase of each railway was effected, the methods actually employed varying in the case of individual railways. The main methods of purchase were :—

- (a) By the issue of India Stock in part exchange for Share Capital of the Companies and the taking over of Debentures and Debenture Stock as State liability.
- (b) By the issue of New Companies' Stock in part exchange for old Companies' Capital.
- (c) By the issue of Terminable Annuities extending over a series of years in part exchange for Share Capital of the Companies.
- (d) By the issue of India Stock in exchange for a portion of the Debenture Stock taken over under (a) and of the Terminable Annuities exchanged for Share Capital under (c).
- (e) By the issue of New Companies' Stock in exchange for a portion of the Terminable Annuities exchanged for Share Capital under (c).
- (f) By cash payment.

2. As explained in the notes on Account No 25, the Railway Capital Account is to be debited permanently with the balance on the 31st March 1924 of the capital liability involved in the purchase of Railways which is being redeemed through Annuities and Sinking Funds, excluding the Discount Sinking Fund of the Oudh and Rohilkund Railway the redemption of which will continue to be a charge against Railway Revenues. Consequently the redemption of capital after 31st March 1924 has not been taken into account in arriving at the liability incurred in the purchase of railways for the purpose of calculating the capital at charge.

No. 25-B.—STATEMENT of LIABILITY involved in the PURCHASE by the STATE of the OLD GUARANTEED RAILWAY COMPANIES.

Class and name of Railway.	INDIA STOCK ISSUED OR APPROPRIATED IN EXCHANGE FOR. sume. When a loan was issued for cash at a discount, the discount was made good from Revenue either by being charged against Revenue in the year in which the loan was issued, or by being charged against Revenue in the year in which the loan was redeemed: in the former case the nominal amount of the loan is entered in the column, in the latter case the cash proceeds. The issue of a loan on the purchase of the undertaking, was an exceptional transaction; no charge was made to Revenue on account of the difference between the nominal and cash value of the loan. In view of the recent change in the treatment of discount on sterling loans [see notes (a) and (b), page 40], the cash proceeds of the 4½ and 5½ per cent loans are shown in the column.

In March 1920 was converted into rupees at the rate of Rs. 10 to the £ and the reduction of cash balance worked out accordingly. A similar reduction of sterling transactions with effect from the accounts for 1927-28.

Discontinued. (See Note on Famine Relief page 465.)

ACCOUNT No. 27.***Statement of Gross Revenue Receipts, Working Expenses and Net Revenue Receipts of State Railways for the year 1929-30.***

This is a statement of the actual revenue results of the year's working. It shows in detail the Gross Revenue Receipts, Working Expenses and Net Revenue Receipts, together with the percentage of ordinary working expenses on earnings for each railway separately during the year.

2. The details of earnings and suspense under Gross Receipts, and those of expenditure and suspense under Working Expenses, are those of the complete Railway systems, including Branch Line Companies, worked by the main lines, in which Government has no capital interest. From the total receipts and working expenses of the systems, the share of the receipts and working expenses of such Branch Line Companies is deducted to arrive at the figures of receipts and working expenses of the lines financed by Government.

3. The details of earnings and suspense under Gross Receipts represent the gross takings of the Railways. The amounts of revenue refunded are shown as a deduct entry separately.

4. The transactions under "Suspense" consist, in the case of receipts, of the difference between (1) the amounts earned but not realised during the year, and (2) realisations during the year in respect of the outstanding earnings of previous years. In the case of Working Expenses, "Suspense" records (1) undisbursed liabilities of the year, (2) disbursements in respect of liabilities of previous years, and (3) miscellaneous advances.

5. As a part of the scheme for the separation of Railway from the General finances, the interest that accrues on the balances in the Depreciation and Reserve Funds, which are mainly held in deposit with the Central Government, is shown under Miscellaneous Receipts in Account No. 31. The contribution from Railway Revenue to the Depreciation fund and the expenditure incurred from that Fund on renewals and replacements are exhibited separately under Working Expenses. The latter, as an appropriation from the Depreciation Fund, is deducted to bring out the final charges to working expenses on account of depreciation during the year.

(a) Shows the net result of contribution to or withdrawal from the Depreciation Fund in respect of State Railways worked by companies.

(b) Expenditure on non-wasting assets and credits on account of released materials are shown in the accounts of Company-managed railways under Repairs and Replacements, but in Government accounts as repairs and maintenance. These items have, therefore, been written back to repairs and maintenance in Government accounts.

ACCOUNT No. 27-B.

Statement of Appropriations to and from Railway Depreciation Fund.

This account sets forth the amounts received into, and withdrawn from, the Depreciation Fund during the year, and also brings out the balance in this fund at the close of the year.

2. On the separation of Railway from General finances, a Depreciation Fund was started, with effect from the 1st April 1924, to provide for the cost of renewing units of all wasting assets with the exception of formation, fencing and ballast.

3. The Depreciation Fund is credited with an amount equivalent to the total expenditure to the end of the previous year on all the units of each class of asset divided by the number of years assumed as the normal life of that class of asset; provided that no credit shall be given on account of any unit after the period assumed for its normal life has expired. It is debited with the original cost of the unit replaced.

4. On State Railways worked by Companies the allocation of expenditure is determined by the terms of their contracts according to which the entire revenue expenditure on renewals and replacements is booked under Working Expenses. This expenditure consists of—

- (i) Expenditure on wasting assets;
- (ii) Expenditure on non-wasting assets; and
- (iii) Credits for released materials.

In Government books (i) is debited to the Depreciation Fund and (ii) and (iii), are transferred to Repairs and Maintenance. The Contribution to the Depreciation Fund is worked out as on rate-managed Railways.

ACCOUNT No. 27-C.

Statement of Appropriations to and from the Railway Reserve Fund.

This account sets forth the amounts received into, and withdrawn from, the Reserve Fund during the year, and also brings out the balance in this fund at the close of the year.

2. The receipts in the Railway Reserve Fund are obtained in the manner explained in the Notes to Account No. 24-A. Amounts may be withdrawn from the Railway Reserve to secure the payment of the annual contribution to General Revenues; to provide, if necessary, for arrears of depreciation and for writing down and writing off of capital; and to strengthen the financial position of Railways in order that the services rendered to the public may be improved and rates and fares may be reduced.

3. The Railway Reserve may also be used for temporary borrowings for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget estimate, subject to the obligation to make repayment of such borrowings out of the revenue budgets of subsequent years.

Reserve Fund Investment Account.

Pending utilisation for the purposes for which the Reserve Fund has been created, a part of the amount standing at credit of the Reserve Fund has been invested in securities of Branch Line Companies, the balance remaining in deposit with the Central Government. The actual amounts so utilised are shown separately in Account No. 27-C. The amounts expended in the purchase of securities have been taken to a separate head 'Reserve Fund Investment Account', while the interest accruing from the investment has been credited to the Railway Revenues (See Account No. 31).

ENDING THE YEAR AND THE BALANCE ON CREDIT AT THE END OF THE COMMENCEMENT AND AT THE CLOSE OF THE YEAR.

ACCOUNT No. 28.

Account of Interest Charges chargeable against the Net Revenue Receipts of State Railways for the year 1929-30.

This is a statement of the liability for interest, etc., on the entire capital at charge of Railways. It shows:—

(1) The interest on debt, *i.e.*, on specific loans raised by the Government of India or the Secretary of State, and on the outlay that has been met from non-specific debt or from Revenue or from other sources.

(2) The interest on Share Capital and Debentures contributed by the Working Companies.

2. Details of the interest on specific loans and on Annuity payments will be found in a subsidiary Statement No. 28-A

3. The principal item in the statement is the interest on non-specific debt. As (except in the case of a certain amount of specific railway debt) no distinction is made in the accounts between loans raised for railway purposes and for the ordinary requirements of Government, the interest chargeable to railways in respect of outlay that has been met from general borrowings and other resources (including the Revenue resources) of Government is calculated with reference to the rate of interest paid by Government on its borrowings as a whole. Since 1917, Government has had to pay a higher rate of interest on its borrowings than in previous years, and the interest on the non-specific portion of the railway debt, therefore consists of (a) interest on all capital expenditure to end of 1916-17 at the average rate paid on borrowings to the end of that year (this rate has been fixed at 3.252 per cent. in perpetuity), and (b) interest on all capital expenditure in subsequent years at the average rate paid on the total borrowings of the subsequent period. The method of calculation to be adopted in future is under consideration.

4 On the separation of Railway from General finances in 1924-25, the Railway Capital Account was permanently debited with the balance on 31st March 1924 of the capital liability involved in the purchase of Railways which is being redeemed through Annuities and Sinking Funds. As a consequence of this arrangement, the Railway Revenue Account is charged with the full interest in respect of the liability outstanding on 31st March 1924, which is included in this account under "Interest on Sterling Debt", and the balance required to make up the total Annuity payments and the Sinking Fund charges is borne by General Revenues.

5 As an exception to this arrangement, the charges for the Discount Redemption Fund for the Oudh and Rohilkhand Railway, created for the redemption of debt incurred in excess of the money raised for the purchase of the Railway, are still debitable to the Railway Revenue Account, and are included in this account along with the interest payments under "Interest on Sterling Debt"

Commercial includes also interest on New Capital Railway Works, Delhi, shown separately in Account No. 28.

* Sinking Funds were established in connection with these Railways to redeem India 3½ and 3 per cent. stock issued in lieu of Annuity or Debenture Stock. These funds have been applied to the purchase of India stock of the denomination offering the best yield. The minus figures represent the interest on India 5½ and 2½ per cent. stock so purchased, and on India 3 per cent. stock purchased in excess of the amount issued.

The Discount Sinking Fund in redemption of Debt incurred in excess of money raised, in respect of the India 3 per cent. stock issued in connection with the purchase of the Oudh and Rohilkhand Railway, has been partly applied to the redemption of India 5½, 4½ and 3½ per cent. Stock instead of India 3 per cent. Stock.

C. and CC.—Irrigation, etc.

Sections C. & CC.—Irrigation, Navigation, Embankment and Drainage Works.

Capital and Revenue Accounts.

The term Drainage Works covers all projects for the relief of water-logging not directly connected with any particular irrigation system, whether for agricultural or anti-malarial purposes or both. Waterways and embankments are included under this head as being more akin to Irrigation than to Civil Works.

2. For the purpose of accounts, Irrigation works are divided into two main categories, those for which it is both desirable and possible to maintain accounts on a *quasi*-commercial basis and those for which it is either impossible or unnecessary to maintain such accounts, either because they produce little or no revenue or because, owing to their restricted size, it is not worth while examining the returns yielded by each individual work. The first essential for a *quasi*-commercial account is the maintenance of a capital account, since it is only by reference to the amount of capital expended that the value of the results obtained can be determined. The first broad distinction is therefore between works for which capital accounts are kept and those for which such accounts are not kept.

3. Works for which capital accounts are kept are further sub-divided into (a) works which are productive and (b) those which are unproductive. Productive Works are works of a remunerative character which are expected to yield, on the expiry of ten years after the date of closure of the construction estimate, a direct return on the capital invested in their construction calculated at 4 per cent. in the case of works sanctioned before the 1st April 1919, at 5 per cent. in the case of those sanctioned between the 1st April 1919 and the 1st August 1921, and at 6 per cent. in the case of works sanctioned after the last mentioned date. Those works which are not expected to yield the required return are classed as unproductive. The classification between productive and unproductive works is, however, dependent on the results of three consecutive years. Thus, if a productive work fails in three successive years to return the prescribed percentage, it is transferred to the unproductive class, and, conversely, an unproductive work may be transferred to the productive class if it succeeds for three consecutive years in satisfying the criterion of productivity. In determining the productivity of an old work developed by Government, the capital expended by Government alone is regarded as the capital at charge on which interest is chargeable.

4. The transactions relating to Irrigation works are exhibited in the accounts as follows:—

- (1) All capital expenditure upon works for which capital accounts are kept is recorded in the first instance under a single major head outside the revenue account, the head being divided so as to show (a) Irrigation and (b) Navigation, Embankment and Drainage Works, each of these divisions being again sub-divided so as to show in separate sub-divisions the capital expenditure on (i) Productive and (ii) Unproductive works. From the *total* expenditure recorded under this head lump deductions are made of the amounts financed from (i) Ordinary Revenues and (ii) the Famine Relief Fund, which has replaced the old Famine Insurance Fund, with effect from the year 1928-29. The result is that the net total finally recorded under this head represents that portion of the expenditure on the construction of works for which capital accounts are kept which is financed outside the revenue account. Resources outside the revenue account take the form of loans, accumulated cash balances of previous years, the revenue surplus of the year in question after all expenditure chargeable to revenue has been met and certain other sources of income not classed as revenue. The capital expenditure incurred upon individual projects and the different sources from which the *total* expenditure on all projects is financed are set forth in Account No.

34. It will be noticed that the distribution of capital outlay between expenditure charged to revenue and expenditure not so charged, which is made in Account No. 34-A, differs considerably from the corresponding distribution at the end of Account No. 34. The reason for this is that a sum of Rs. 17,22,18,089 in all was, prior to 1920-21, expended from the revenues of the Central Government upon the construction of irrigation works in the provinces. In Account No. 34-A, which makes no distinction between Central and Provincial expenditure, this outlay is properly treated as expenditure from revenue. When the reformed constitution was introduced in 1920-21, Devolution Rule 24 provided that all sums so expended should be treated as advances made by the Central Government to the Provincial Governments. From the point of view of the latter, therefore, the works were constructed, not out of revenue, but out of borrowed funds. It follows that in Account No. 34, in which Central and Provincial outlay are separately exhibited, this expenditure should properly be shewn as expenditure not charged to revenue. This was done for the first time in the accounts for 1926-27.

- (2) The revenue transactions of works for which capital accounts are kept consist of—
- (a) Gross Receipts, including the portion of Land Revenue due to Irrigation (Account No. 33),
 - (b) Working Expenses and Maintenance (Accounts Nos. 33 and 36), and
 - (c) Interest on Capital at Charge (Account No. 33).

The working expenses of works for which capital accounts are kept, which formerly constituted an expenditure head, are shown as a *deduct* entry under Revenue.

- (3) Works for which no capital accounts are kept, which may appropriately be described as non-commercial works, fall under two main divisions:—

- (i) Works for which revenue accounts only are kept.
- (ii) Works for which neither capital nor revenue accounts are kept.

The first division formerly comprised a number of old indigenous works, many of them of considerable magnitude, which had from time to time been taken over by the Government. The original cost of these works not being known, no capital account of them was kept but, as they were too large or important to be lumped together with others, separate revenue accounts of them were maintained. The ruling cited in paragraph 3 above that, for the purpose of determining the productivity of such works, the capital expended by the Government shall be regarded as the capital value of the work has, however, materially altered the position. This class of works has now practically disappeared.

The second division is designed for the reception of the expenditure upon a very large number of works, which, while collectively of great importance, are individually too small to make it worth while to maintain separate accounts for each.

Besides the above, there is another class of expenditure which is charged against the head "Works for which no capital accounts are kept." This is miscellaneous expenditure on surveys of new irrigation projects, etc., for which a separate division has been provided under the title "Miscellaneous Expenditure". The pensionary charges of the Irrigation Department were previously included under this head, but from the accounts for 1926-27 these charges are being debited to the respective Irrigation heads of account; except in Bihar and Orissa and in the Central Provinces, where the change of classification was introduced for the first time in the accounts for 1927-28.

The receipts and expenditure connected with works for which no capital accounts are kept are exhibited in Accounts Nos. 37 and 38. Previous expenditure on these works was in most cases financed partly from ordinary revenues and partly from the Famine Insurance Grants or Funds. Under the new rules governing the use of the Famine Relief Funds, those Funds are now rarely used to finance irrigation works.

5. The main scheme of the accounts as exhibited in the Finance and Revenue Accounts is designed to show :—

- (a) A summary of the general results of Irrigation, Navigation, Embankment and Drainage Works and the net gain or loss to Government (Account No. 32).
- (b) The capital at charge of each project for which capital accounts are kept (Account No. 33).
- (c) Net receipts of such projects, comprising the gross receipts less the expenses of working (Account No. 33).
- (d) Percentage of (c) on (b) (Account No. 33).
- (e) Interest on Capital at Charge (Account No. 33).
- (f) Receipts and expenditure of works for which no capital account are kept (Accounts Nos. 37 and 38).

6. It has been decided that when a Local Government, owing to the fact that loan funds are not available, devotes its general revenues to an object upon which outlay may, under the Local Government (Borrowing) Rules, be met from loans, it will be open to that Local Government to include in the objects for which it may raise a subsequent loan the repayment to general revenues of the amount already expended from them. The reason for this provision is clear; it is undesirable that Local Governments should be forced into the market at an inopportune time merely to protect their general revenues from being charged with expenditure of a nature which they are not primarily intended to meet. If, therefore, there were in any year a debit to the revenue major head of an amount representing capital expenditure met from general revenues, and the Local Government raised a sufficient amount of loan in a subsequent year, it would be permissible for it to utilize part of this loan in recouping the capital expenditure met from general revenues in the previous year. The amount would then be transferred to the capital from the revenue head of account by *add* and *deduct* entries in Account No. 34. This principle was applied in the accounts for 1922-23 by the Government of Bengal.

(a) *See* footnote on page 193.

(b) In the calculation of this figure, a sum of Rs. 3,50,325 credited to the capital account of the Mutha Canal Project in 1918-19, on account of the separation of Poona Water Works, has been taken in reduction of the capital outlay to end of 1918-19, as the credits really relate to expenditure incurred during that period.

(a) A new system of accounts based on commercial principles has been introduced in the Central workshop from 1924-25. The method of accounting applicable to Government Commercial Undertakings has, not, however, been applied to this concern upto 31st March 1926.

(b) Transferred from "Productive" to "Unproductive" class during the year.

(a) *Vide* footnote on page 193.

(c) In the calculation of this figure a sum of Rs. 17,94,319 credited to the capital account of the Twante Canal Project during 1917-18 and 1918-19, on account of the sale-proceeds of certain dredgers, has been taken in reduction of the capital outlay to end of 1916-17, as the credits relate to expenditure incurred during the latter period.

2 M

Sections D. and DD.—Posts and Telegraphs.**(i) Indian Posts and Telegraphs Department.****(ii) Indo-European Telegraph Department.****CAPITAL AND REVENUE ACCOUNTS.****GENERAL.**

Under this section are included the accounts of two independent Departments, the Indian Posts and Telegraphs Department and the Indo-European Telegraph Department. The latter system connects with that of the Indo-European Telegraph Company to form one of the routes for telegraphic communication between India and Europe, and also provides much of the internal communication in Persia. The Indian Posts and Telegraphs Department supplies Postal, Telegraph, Wireless and Telephone service in India. Traffic with Australia and other countries to the east of India is controlled by other Telegraph Administrations.

CAPITAL ACCOUNTS.

2. A commercial system of accounts has been introduced in both these Departments with effect from 1925-26. Block accounts have been prepared showing the present value of the existing assets. The Valuation Reports revealed that the amount of 'expired capital outlay' on 1st April 1925 was very considerable and that assets representing an appreciable amount of expenditure had been lost or abandoned in the past. A Depreciation Fund, contributions to which are made on a Sinking Fund plan, has also been instituted, but the Fund bears the cost of replacements to the extent of the depreciation accruing after 1st April 1925 only, while the balance of the expenditure, which corresponds to the expired capital outlay on the 1st April 1925, is met by interest-bearing advances from General Revenues.

3. All Capital Outlay, including that on renewals and replacements, is recorded under two capital major heads, 56-1 and 56-11, outside the Revenue Accounts. The reconstituted capital accounts of the two Departments started with the depreciated values of the assets existing on 1st April 1925 shown in the Valuation Reports, and interest is payable on these total amounts whether financed from Loan Funds or from Revenue. The capital account of the Indian Posts and Telegraphs Department has been reconstituted without reference to the portion of the assets constructed from Revenue or to the portion constructed from Loan Funds. It is impossible to distinguish in the reconstituted capital accounts, in which depreciated values have been taken and from which abandoned assets have been omitted, the portions which should and should not be charged to Revenue. Hence the Capital outlay prior to 1925-26 has not been distributed between outlay charged to Revenue and outlay not charged to Revenue. All expenditure on Postal Buildings is charged to Revenue and, in the accounts for 1925-26, the Stores and Manufacture Suspense balance was transferred by actual account adjustment from Capital met from Revenue to Capital not charged to Revenue. The portion of capital expenditure which the Government of India decide in each year to meet from Revenue is deducted in lump and transferred to a capital major head in the Revenue section of the account.

REVENUE ACCOUNTS.

4. The Revenue accounts of the two Departments were also then re-organised. Contributions to cover depreciation are charged as part of the year's working expenses and the departments also make a contribution to General Revenue to cover their pensionary liability towards their employees.

The general plan of the Revenue accounts of the Indian Posts and Telegraphs Department has undergone extensive revisions to enable the profit or loss under each of the four branches, Post Office, Telegraphs, Radio Telegraphs and Telephones, to be exhibited separately. The Revenue accounts of the Indo-European Telegraph Department have also been recast on the same plan, but there is only one Profit and Loss account for the whole Department.

5. The initial compilation of outlay on renewals and replacements is at present made under two sub-divisions, 56-I (b) and 56-II (b), of the Major heads 56-I and 56-II, the portion chargeable to the Depreciation Fund being transferred to the Fund through the Revenue accounts, but it is proposed to open two new Major heads in the Revenue section of the account for this purpose.

6. The various classes of receipts and expenditure are shown under descriptive heads in accounts Nos. 40 and 41-A. and the subsidiary statements.

INDIAN POSTS AND TELEGRAPHS DEPARTMENT.

The major portion of the receipts of the Indian Posts and Telegraphs Department is derived from postage and message revenue which accrues chiefly from sale of stamps. A lump sum representing the Local Governments' share of the value of unified stamps used for revenue purposes is transferred annually to VII—Stamps (see Notes under Stamps, page 122). The other important sources of revenue are commission on money orders, rents of wires leased to railways and canals, rents recovered from subscribers to telephone exchanges and trunk call fees. The division of postage and message revenue between the Postal and Telegraph Branches is made on the basis of an actual enumeration of telegrams for specified periods of the year. The other receipts can be allocated directly to one branch or the other.

The working expenses of the Indian Posts and Telegraphs Department are principally incurred upon establishments, conveyance of mails, maintenance of telegraph and telephone lines and exchanges and wireless stations. The present arrangement of the accounts is such that expenditure on one branch or another is separately exhibited where this is possible. In the case of general charges or of charges incurred jointly by two branches, a distribution is made on the scientific basis which is the most suitable in each case.

22

INDO-EUROPEAN TELEGRAPH DEPARTMENT.

The revenue of the Indo-European Telegraph Department accrues partly in India and partly in England. The Indian portion of the revenue is almost entirely Message Revenue, while the receipts in England represent the shares of this Department as determined by the Joint Purse Agreement and the Agreement governing the Australasian Message Fund. The former was concluded in 1879 with the other two Companies providing telegraphic communication between India and Europe in order to avoid ruinous competition. The receipts of all the three parties are pooled into a Joint Purse and then divided between them according to the Agreement. The Australasian Message Fund is the result of an agreement between the Joint Purse partners and the Eastern Extension Telegraph Co., which provides telegraphic communication between India and Australasia. Its object is to make up the loss due to the adoption of an uneconomic rate for Australian traffic. The working expenses of the Indo-European Telegraph Department are of similar nature to those of the Indian Posts and Telegraphs Department, but the position is complicated by the fact that the Department maintains and uses, under various agreements, some lines which are the property of the Persian Government.

				TOTAL .	6,84,15,954	19,38,53,745

This section deals with the charges connected with the services of the Public Debt of the Central and Provincial Governments, as also of other unfunded obligations of the Government of India. The receipts brought to account in this section are mainly derived from interest on the securities held in the Gold Standard Reserve, from payments made by public bodies and individuals on loans and from temporary investment of the cash balance in England. They are therefore treated as an appropriate set off to the charges brought to account under this section.

XVI—Interest.

The amounts recorded under this head relate chiefly to transactions connected with the Treasury cash balances. The interest realised from the investments of the Paper Currency Reserve is credited to the major head 'Currency' (see Note under 'Currency', page 417), but the interest on investments of the Gold Standard Reserve has been credited to this head since 1923-24, but see note to Account No. 92-B, page 645.

2. The following items deserve special comment :—

Interest on Famine Relief Fund.—The interest payable by the Government of India on the balance of the Famine Relief Fund, as well as that payable by the Provincial Government on advances from the Famine Relief Fund to finance the Provincial loan account, is credited to the Fund itself (*vide* Account No. 87, page 634) and not to "Interest".

Interest on Provincial Balances.—This represents interest allowed by the Government of India to Local Governments on fixed deposits of surplus provincial balances under conditions prescribed by the Government of India. This interest is payable on all fixed deposits of not less than Rs. 25 lakhs (Rs. 10 lakhs for Assam) made for not less than six months at a time. The rate of interest payable on deposits initially declared for twelve months or over is 1 *per cent.* less, and that on deposits for shorter periods 2 *per cent.* less, than the rate charged by the Central Government to the Provincial Loans Fund on advances made to it during the period. The rate of interest charged on advances to the Provincial Loans Fund during 1929-30 was 5½ *per cent.*

for the year ended 31st March 1930.

19—Interest on Ordinary Debt.

The 'Ordinary Debt,' for the purpose of this head of account, represents the total amount of public loans raised in India and in England by the Central and Provincial Governments *less* the amount of capital debited to Commercial Departments or Departments whose accounts are kept on commercial principles.

2. All cash payments on account of interest on Permanent, Temporary and Floating Debt of the Central and Provincial Governments in India and in England, including charges on account of discount, are in the first instance charged to this head. Transfers are then made to the Railway, Irrigation, Posts and Telegraphs and other Commercial sections of the accounts of interest on Railway, Irrigation, Posts and Telegraphs and other capital outlay on commercial services. The manner in which this interest is calculated is described in the Note on Railways (*vide* page 176).

3. Interest is charged by the Central to the Provincial Governments on advances from the Provincial Loans Fund, including (i) Central moneys still held by Local Governments in their Provincial Loan Accounts, (ii) capital expenditure on Irrigation works incurred from Central Revenues up to the end of 1920-21, and (iii) other loans and advances made from the Fund. This interest is credited to the Fund (see page 629), while the interest paid by the Fund on advances taken from the Government of India is taken in reduction of charges under this head. The interest charges of provincial Governments debited under this head consist of the interest paid to the Provincial Loans Fund, together with any interest paid on provincial borrowings in the open market.

No. 42A.—ACCOUNT of the PUBLIC DEBT of the GOVERNMENT OF INDIA, bearing INTEREST; THE ANNUAL INTEREST thereon; and the INTEREST paid during the year ended 31st March 1930.

20.—Interest on other obligations.

Under this head are recorded payments of interest on all obligations of Government other than the Public Debt of India. These consist of funds deposited with Government for special purposes and fall under the following main classes:—

- (i) Deposits in Post Office Savings Bank and Cash Certificates.
- (ii) Special Loans:—These comprise, in the main, funds deposited with Government as endowments of various institutions. The principal item is a deposit made by the late King of Oudh to endow certain charities and pensions
- (iii) Deposits of various provident funds established by Government for the benefit of its employes, of which the most important are the Railway and General Provident Funds.
- (iv) Deposits of Service Funds:—These consist of the deposits of certain funds, mostly under private management, which are permitted to bank with Government.
- (v) Deposits of certain special funds like the Postal Insurance and Life Annuity Fund.
- (vi) Fixed deposits of Provincial Governments.
- (vii) Deposits of balances of the Famine Relief Fund.
- (viii) Deposits of the Railway Reserve and Depreciation Funds and Depreciation Funds of other Commercial Departments and undertakings

The sub-divisions under these classes are given in Account No. 44, with the balances held under each, the rate of interest allowed, and the actual amount of interest paid during the year.

No. 44.—ACCOUNT showing the OBLIGATIONS of the GOVERNMENT of INDIA, bearing INTEREST, and the INTEREST paid thereon, for the year ended 31st March 1930, in continuation of the Account of the PUBLIC DEBT (Accounts Nos. 42A & 43).

(a) Includes payments in England.

21.—Appropriation for Reduction or Avoidance of Debt.

This head is intended for the record of appropriations from revenue for redemption of debt of the Central and Provincial Governments. The amounts debited to the head 'Sinking Funds' represent specific appropriations for regularly constituted Sinking Funds or Depreciation Funds for the redemption of loans raised by the Central and Provincial Governments, while the debits under 'Other Appropriations' represent appropriations for reduction or avoidance of debt otherwise than by means of regularly constituted sinking funds. The amounts are debited to this head by *contra* credit to the Deposit head 'Appropriation for Reduction or Avoidance of Debt', which is debited with charges connected with the redemption of debt either by purchase and cancellation of securities or by direct discharge. On actual cancellation of stock, the nominal value of the cancelled securities is written off the Public Debt Account (Accounts Nos 82 and 82A). The application of the balances of the Sinking Funds in 1929-30 is shown in Account No. 89.

2. Under the scheme of debt redemption adopted by the Government of India for the five years 1925-26 to 1929-30, the annual charge against the Central Revenues for the purpose of making provision for reduction and avoidance of debt is made up of—

(a) a sum of Rupees 4 crores, and

(b) such additional sum as is equal to one-eightieth of any excess in the total of the debt outstanding on the 31st of March of the preceding year over the total outstanding on the 31st March 1923.

For the purpose of this scheme, the total debt outstanding on the 31st March 1923 has been taken as Rs. 8,46.78 crores, made up as shown below, and the total debt outstanding on the 31st of March of any year subsequent to 1923 is such total as may be certified by the Auditor General in India to be the total arrived at by applying similar calculations for subsequent years:—

(Figures are in crores of rupees, sterling amounts being converted at Rs. 15 per £).				
	31st March 1923.		31st March 1929.	
	Rs.	Rs.	Rs.	Rs.
Rupee Debt exclusive of Treasury Bills in the Paper Currency Reserve .	3,61.42		3,04.73	
Sterling Debt	3,63.95		4,50 05	
Unfunded Debt	62.56		1,27.95	
Capital value of the liabilities undergoing redemption by way of terminable Railway annuities .	91.97		80.03	
	<hr/>	8,79.90	<hr/>	10,52.76
<i>Deduct</i> —Discount included above but separately provided for .	8.23		15.46	
„ Advances to Provincial Gov- ernments other than those representing Pre-Reform Irrigation Debt	24.69		74.92	
	<hr/>	83.12	<hr/>	93.28
		<hr/>		<hr/>
		8,46.78		9,59.38

The amount adjusted under this scheme in the accounts for 1929-30 is Rs. 5,40,75,000, and this, together with the sum of Rs. 32,98,000 representing the amount of reparation receipts under the Dawes Schemes and under the Young Plan in accordance with clause 7 of the Indian Finance Act, 1926, formed the total charge of Rs. 5,73,73,000 brought to account under this head in the Central section of the accounts for 1929-30.

F.—Debt Services.

3. The obligatory charges against the annual provision for debt redemption are :—

- (a) Railway Sinking Funds now in operation,
- (b) Depreciation Funds of $1\frac{1}{2}$ per cent. on the 5 per cent. Rupee Loans of 1929-47 and 1945-55,
- (c) the capital portion of Railway annuities, and
- (d) the capital portion of the annual payment in redemption of India's outstanding liability in respect of British War Loan.

The balance, if any, may be applied towards the avoidance of new borrowing or the reduction or repayment of such other debt as the Governor General in Council may think fit. Should, however, the total of the four items exceed, in any year, the amount prescribed, the balance is to be charged to Capital.

Of the above items, the actual expenditure under (a), (c) and (d) is incurred in England. As, however, it is found more convenient to record in the Indian section of the accounts the entire expenditure from revenue upon redemption of debt, the procedure described in paragraph 1 above has been adopted. Under this procedure, the revenue provision for these items is credited to a deposit head, which is closed to 'Government Account' at the end of the year, thus merging the provision in general balances. The payments made in England are met from these balances and charged to "N.—Public Debt". The revenue provision for the three items in question is shown under the head "Other Appropriations" in this Section of the Account; the expenditure under item (b) being separately exhibited against the head "Sinking Fund".

4. The rules for the constitution of the Provincial Loans Fund require Provincial Governments to make available annually out of their ordinary revenues a sufficient amount to redeem all loans (other than the Pre Reform Irrigation debt) borrowed otherwise than from the Fund within a period of 80 years. The amounts provided under this arrangement are charged in the Provincial Accounts to "21—Appropriation for Reduction or Avoidance of Debt".

F. and FF.—Civil Administration.

Section F.—Civil Administration.

The major heads grouped in this section deal chiefly with the salaries and expenses of the various departments constituting the Civil Administration of the country. The receipts of these departments are comparatively insignificant and are in most cases merely recoveries of expenditure. The nature of the expenditure is explained in the explanatory notes under each of the major heads.

Section FF.—Capital Expenditure not charged to Revenue.

The expenditure brought to account in this section relates to capital outlay incurred by the Central and Provincial Governments on measures connected with the improvement of Public Health, Agricultural Improvements, the construction of Vizagapatam Harbour, etc. The capital expenditure on Light Houses and Light Ships has been brought under this Section from 1929-30.

22.—General Administration.

The charges recorded under this head relate chiefly to headquarters administration and also to the cost of district administration which, prior to 1921-22, was divided between the heads "Land Revenue" and "Administration of Justice". The salaries and other allowances of Heads of Provinces, as also of the Governor General, and the Executive Councils and Ministers; the expenses connected with the Council of State, the Indian Legislative Assembly and the Provincial Legislative Councils; and the charges of the Secretariats, Boards of Revenue, Commissioners, District Officers and their establishments constitute the main items in the Indian accounts.

2. The English charges consist mainly of the salaries and expenses of the Secretary of State's Council and his establishment; and the charges of the office of the High Commissioner, who acts as the agent of the Governments in India in respect of the purchase of stores and certain other matters. The salaries of the Secretary of State and of the Parliamentary Under Secretary of State are borne on the British Estimates and a lump sum contribution is also made to Indian revenues on account of the cost of staff employed at the India Office on non-agency functions. This contribution is distributed, in the accounts, between the three heads 'General Administration', 'Audit' and 'Stationery and Printing' (*vide* Accounts Nos. 46, 47 and 73-A). The contribution in the year 1929-30 amounted to £115,000.

3. In all the provinces excepting Bihar and Orissa the salaries of Ministers are classified as "Transferred".

4. The charges relating to village establishments in several provinces formerly shown under '5.—Land Revenue' are now recorded under this head.

												12,71,052

(a) Expenditure relating to other heads has been classified as "Miscellaneous".

23.—Audit.

The salaries, establishments and other charges of the Auditor General and of the various Accountants General, including the Director of Commercial Audit, who audit *civil* transactions are shown under this head. Prior to 1921-22, these charges were included under the head "General Administration".

2. The charges connected with the audit of transactions of the Railway, Posts and Telegraphs and Northern India Salt Revenue Departments are debited under the respective heads pertaining to those departments. The charges of the Director of Army Audit are recorded under this head, while the cost of maintenance of Army accounts is treated as a military charge.

A similar course has been adopted in connection with the experimental separation of accounts from audit in the United Provinces and the North-West Frontier Province, the cost of audit alone being charged against this head, while the cost of maintaining the accounts has been taken to General Administration as Secretariat charges.

3. The charges in England include the pay of the Auditor of Indian Home Accounts and his assistants appointed under Section 27 of the Government of India Act. A portion of the charge is covered by the lump contribution by His Majesty's Government mentioned in the Note under "General Administration".

TOTAL CHARGES OF THE AUDIT DEPARTMENT

1,01,63,909

(a) This expenditure has been charged against the grant for the Separation of Accounts from Audit. See also in this connection paragraph 2 of the General Note on page 330.

XVII and 24—Administration of Justice.**GENERAL.**

Prior to 1921-22, this head was designated “^{XVI-A.}_{19-A.} Law and Justice—Courts of Law”.

REVENUE.

The bulk of the revenue under this head accrues from “General fees, fines, and forfeitures” which consist chiefly of receipts from fines and confiscations ordered by magisterial courts.

EXPENDITURE.

The expenditure consists chiefly of the pay of civil and criminal judges and magistrates and their establishments, with some charges on account of Administrators-General and Law Officers of the different Provincial Governments. As stated under the head “Land Revenue”, the charges of district executive officers performing magisterial functions were formerly distributed between that head and the present head, generally in moieties.

The variations, as between different provinces, in expenditure upon criminal courts are due to the fact that full-time judicial establishments alone are charged to this head. In certain provinces, magisterial work is largely performed by the ordinary district administrative staff, the cost of which is debited to “22—General Administration”.

XVIII and 25—Jails and Convict Settlements.**REVENUE.**

The principal item of revenue is the proceeds of the sale of jail manufactures which is, however, largely counterbalanced by expenditure involved in their production.

All receipts in the convict settlements in the Andamans and Nicobars, including those on account of jail manufactures, are shown under a separate head "Convict Receipts at Port Blair and Nicobars".

EXPENDITURE.

The expenditure consists mainly of the maintenance charges of the jail population and the cost of production of jail manufactures, together with the pay and allowances of the necessary establishments.

As with the receipt head, all the charges connected with the convict settlements in the Andamans and the Nicobars are shown under a distinct head.

XIX and 26—Police.**REVENUE.**

Compared with the expenditure, the receipts are insignificant and consist mostly of (i) recoveries of expenditure on special police, and (ii) fees levied for services controlled by the Police Department, such as receipts under the Public Conveyance Act, etc. The lump sums recovered from Railway Companies under the terms of their existing contracts are also credited to this head (see paragraph 2 below).

EXPENDITURE.

2. The great bulk of the expenditure is on account of the police force and its supervision. The charges on account of the Railway Police were formerly distributed between Government and Railways in the proportion of $\frac{2}{10}$ ths and $\frac{7}{10}$ ths. Since 1919-20, the Government bears all charges for 'Crime and Order' police, the Railway Companies being responsible for the control of, and the charges on account of, 'Watch and Ward' police, besides making a lump contribution to Government equivalent to the difference between what each railway is required by its contract to pay, viz., $\frac{7}{10}$ ths of the charges on account of both classes of railway police, and the whole cost of the 'Watch and Ward' police. The charges of the Criminal Investigation Department also are included under this head.

XX and 27.—Ports and Pilotage.

Ports are classed under two divisions, 'A—Major Ports' and 'B—Minor Ports,' the former being under the control of the Central Government and the latter of the Provincial Governments. Madras, Bombay, Calcutta, Chittagong, Rangoon, Karachi, Aden and Vizagapatam are Major Ports. The rest are Minor Ports.

2. Receipts and charges connected with the maintenance of river flotillas, pilot establishments and harbours are shown under this head. The receipts and charges connected with Light-houses and Light-ships, which were hitherto recorded under these heads, are now shown under "XX(1) and 27(1)—Light-houses and Light-ships" (see page 359.)

3. In Bengal alone the Pilot Service is a Government service. Similar services in ports of other provinces are controlled by the Port Trusts, and their revenues and expenditure are recorded in Local Fund accounts. In view of the introduction of a commercial system of accounts for the Bengal Pilot Service, the transactions of that Service are shown under separate sub-divisions of the Major heads "XX and 27—Ports and Pilotage".

Expenditure not charged to Revenue.**56 E.—Capital outlay on Vizagapatam Port.**

This is one of the new Capital major heads opened in the accounts for 1925-26. It exhibits the capital expenditure in connection with the development of Vizagapatam Harbour, which has been undertaken to afford an outlet easy of approach for the trade of the Central Provinces and Upper India generally, and to ease the congestion at the Port of Calcutta and also to some extent, at Bombay, and on the railways leading to them.

(b) Rs. 3,794 representing interest on the cost of land acquired in previous years written off without financial adjustment.

XX(1) and 27(1)—Lighthouses and Lightships.

These major heads as well as the corresponding Capital head "56-E.-II.—Capital expenditure on Lighthouses and Lightships" have been introduced from the accounts for 1929-30 following the reconstitution of the accounts of Lighthouses and Lightships in India. To ascertain whether the Lighthouses administration in India is self-supporting, *i.e.*, whether the receipts from the light dues over a fixed period are sufficient to cover all charges thereon, and with the idea of improving the efficiency of the service, it has been decided that the service should be administered on an all-India basis and that its accounts should be maintained on commercial lines within the Government account in order that the results of the financial working of the Department should be obtainable with greater facility and more accuracy than has been possible in the past. For this purpose, the Government account exhibits capital expenditure, indirect charges such as those for depreciation of fixed assets, interest on capital and cost of accounts and audit. The accounts also show necessary reserves and pensionary liability in addition to the ordinary running expenses and annual maintenance. A separate income and expenditure account and a balance sheet in commercial form are prepared from the Government account at the end of each year, and any surplus on the Income and Expenditure account of each year is transferred to a General Reserve Fund which is also debited with any deficiencies on the same account. Any large surplus in the Fund is utilised to finance new capital expenditure on Lighthouses and Lightships. These accounts appear in the Appendix to the Appropriation Accounts of the Central Government (Civil) containing accounts and reviews of Government Commercial concerns.

56-E.-II.—Capital expenditure on Lighthouses and Lightships.

This account shows the total capital invested on Lighthouses and Lightships during and to end of each year and the different sources from which the expenditure has been financed.

28—Ecclesiastical.

Apart from a trifling sum spent on cemeteries, the charges under this head consist of the stipends of Bishops and Chaplains together with the pay of their small establishments. The stipends of Chaplains attached to regiments are debited not to this head but to the Army Estimates (see Account No. 75 D., page 544).

29—Political.

The charges classified under 'Political' arise out of the relations of the Government of India with the Indian States and the Foreign Governments adjoining the British Empire in India, and include expenditure in connection with important political *détenu*s, etc. Charges connected with the defence operations on the various frontiers are recorded under the major head "29A.—Frontier Watch and Ward" with effect from 1927-28. All other charges debited under this head prior to 1921-22 are now recorded under 'Miscellaneous'.

2. The great bulk of the *normal* political expenditure relates to (i) the cost of political officers and their establishments, (ii) the subsidies paid to the several frontier states, (iii) the expenses of refugees and State prisoners, (iv) the cost of advisory officers and their establishments employed with Indian State Forces and (v) entertainment charges of envoys and chiefs. Expenditure of a *special* character, incurred from time to time, is, however, shown under the head "Special Political Expenditure". Political charges in connection with the Hedjaz Pilgrimage are also recorded under his head.

29A.—Frontier Watch and Ward.

This major head has been opened from the accounts for 1927-28 to accommodate charges directly connected with the protection of the various frontiers, which include, besides expenditure incurred on various denominations of military police organisations, expenditure on roads declared to be of military importance and charges for hospitals and other buildings required for the administration of the military police forces. Charges connected with the ordinary civil administration of the frontier areas, including expenditure on buildings and communications, are brought to account under the appropriate heads of service concerned. Prior to the year 1927-28, these charges were recorded mostly under the major head "29—Political."

XXI and 31—Education.**REVENUE.**

The great bulk of the revenue is derived from school and college fees. The revenue, however, is insignificant as compared with the expenditure.

EXPENDITURE.

2. The expenditure recorded under this head is that controlled by the Education Department. Certain classes of education, *e.g.*, medical, industrial, agricultural, are controlled by the respective departments administering those subjects and the expenditure on that account is charged in their budgets.

3. The basis of the division of education into 'University,' 'Secondary,' 'Primary' and 'Special' is the classification of each school or college according to the grade of education which it is primarily intended to impart. Thus, the expenditure on a school may be classified as 'Secondary' even though it includes primary classes.

4. The sub-head 'University' includes the expenditure on collegiate education, both arts and professional, but not expenditure on intermediate colleges which is included under 'Secondary'. The term 'Special' includes professional schools and reformatory schools where such schools are controlled by the Education Department.

5. The expenditure under each of the four main sub-heads includes both direct and indirect expenditure, the latter consisting of grants-in-aid by Government to private and local fund schools. The term 'General Expenditure' includes expenditure common to all kinds of education, such as Direction and Inspection, and also miscellaneous expenditure.

6. Expenditure on educational buildings constructed by Government is generally debited under the Public Works head '41—Civil Works' and not under this head, except where such buildings are formally assigned to the Education Department for execution of works or for maintenance.

(a) Represents expenditure on Suspended Transferred subject, vide foot note(a) on page 70.

(b) Includes mainly

F. and FF.—Civil Administration.

XXII and 32—Medical.**REVENUE.**

The receipts are small and are made up of fees paid by students in medical schools and colleges and recoveries from paying patients in ordinary and mental hospitals. Some amounts are also realised from contributions by the public or by individual benefactors.

EXPENDITURE.

2 The maintenance of Government hospitals and dispensaries, together with the grants paid to private and Local Fund hospitals, is the most costly item of expenditure and is included under the head 'Hospitals and Dispensaries'. Next in importance is the pay of 'Medical Establishment', which includes all superintending and other civil medical establishments not specifically attached to hospitals. Charges of medical schools and colleges, mental hospitals, Chemical Examiners, the X-Ray Institute at Dehra Dun and certain miscellaneous grants for medical purposes (such as those made to the Lady Hardinge Medical College at Delhi and to the Countess of Dufferin's Fund) constitute the rest of the expenditure.

3. Charges on account of medical buildings are generally shown under '41—Civil Works', except those relating to buildings the construction or maintenance of which has been formally assigned to the Medical Department.

XXIII and 33—Public Health.**REVENUE.**

Sale proceeds of sera and vaccines form the most important item of receipts under this head.

EXPENDITURE CHARGED TO REVENUE.

2. 'Grants for Public Health Purposes' is the heaviest item of expenditure under this head. These include contributions to Local Bodies for the employment of health officers and for the development of sanitation (water-supply and drainage schemes and the like), and grants to special health organisations, such as the Indian Research and Public Health funds. Expenses of combating epidemic diseases like plague, malaria, and cholera and in connection with bacteriological laboratories and Pasteur Institutes, together with the cost of supervising establishments and sanitary works controlled and executed by the Sanitary Engineers make up the great bulk of the remaining expenditure.

EXPENDITURE NOT CHARGED TO REVENUE.**56 A.—Capital outlay on Improvement of Public Health.**

This head records the expenditure of a capital nature financed from borrowed funds in connection with projects of public health improvement.

XXIV and 34.—Agriculture.**GENERAL.**

Receipts and charges pertaining to the Civil Veterinary Department are included under this head.

REVENUE.

2. Agricultural receipts are derived mainly from the experimental farms established by Government and from botanical and other public gardens. Receipts on account of the sale of the anti-rinderpest serum issued from the Imperial Bacteriological Laboratory at Muktesar, together with those derived from the Hissar Cattle Farm in the Punjab, constitute the bulk of the veterinary receipts. Agricultural and veterinary education, which also is dealt with under this head, contributes a small income in the shape of fees.

EXPENDITURE CHARGED TO REVENUE.

Under 'Agriculture' are included the cost of the Agricultural Departments, the various agricultural experiments conducted by experts, experimental and model farms established by Government for the edification of the agriculturist, agricultural education and certain other miscellaneous charges. Charges connected with the development of co-operative credit among agriculturists are shown under a separate minor head. Veterinary charges include, besides the cost of the Civil Veterinary Department and veterinary education, the charges on account of the maintenance of veterinary hospitals and dispensaries and of breeding operations.

3. Accounts of a commercial nature are maintained for certain concerns controlled by the Agricultural Department and annual trading and profit and loss accounts and balance sheets appear in the Appendix to the Appropriation Accounts of the Central Government (Civil) containing accounts and reviews of Government commercial concerns.

EXPENDITURE NOT CHARGED TO REVENUE.**56 B.—Capital outlay on Agricultural Improvements.**

This head records the expenditure of a capital nature financed from borrowed funds in connection with projects of agricultural improvement

Total Expenditure not charged to Revenue during 1929-30 .		—7
Total Expenditure not charged to Revenue to end of 1929-30 .	(b) 94,776	(a) 4,04,328

(a) Relates to capital expenditure in connection with extension of the Agriculture College, Chawnpore. The *minus* figure during 1929-30 is due to transfer of Rs. 92 from this head to "to Civil works".

(b) Represents expenditure incurred in 1923-24 on account of cost of acquisition of land for the Agricultural College, Poona.

XXV and 35—Industries.

Besides the regular industries conducted by Government, transactions connected with cinchona plantations, manufacture of drugs and industrial education are shown under this head. In Madras and the Punjab the Schools of Arts have come under the Industries Department.

EXPENDITURE NOT CHARGED TO REVENUE.**56 C.—Capital outlay on Industrial Development.**

This capital major head was opened in the accounts for 1923-24 for the exhibition of capital outlay on certain Industrial Development Schemes undertaken by Provincial Governments.

No. 59.—ACCOUNT OF RECEIPTS under INDUSTRIES for the year ended 31st March 1930.

(b) Represents adjustment on account of withdrawal of capital during 1929-30.

(c) Represents capital at credit of Government on the books of the concerns on 31st March 1930.

36-Aviation.

Charges in connection with *Civil* aviation appear under this head. Military aviation is dealt with under 'Army'. Expenditure on buildings, aerodromes, landing grounds and other works connected with civil aviation in India, of which the administrative control has been transferred from the Public Works Department to the Director of Civil Aviation in India is being recorded under this head from 1929-30.

The Indian State Air Service (Karachi-Delhi Section) is a government service. The Director of Civil Aviation deals with all matters arising out of the actual operations connected with the flying of the aircraft chartered from Imperial Airways for the performance of service between Delhi and Karachi. The commercial management of the Service in relation to the carriage of passengers and their luggage, mails and freight, has been undertaken by the Indian Posts and Telegraphs Department as a purely temporary and provisional arrangement. The receipts and charges in connection with the service are credited and debited to 'XXVI—Miscellaneous' and '36—Aviation', respectively, but air mail fees recovered from the public are credited as revenue of the Posts and Telegraphs Department which affords a credit to the Civil Aviation Department at the rate of Rs. 4 per lb. of mails carried by the Service.

No. 60.—ACCOUNT of CHARGES on CIVIL AVIATION during the year ended 31st March 1930.

XXVI A and 37.—Indian Stores Department.

The Indian Stores Department was constituted with a view to effecting economical purchases of stores in India on behalf of all Departments of the Central Government and Local Administrations, as well as of such Provincial Governments, Company-worked Railways, Port Trusts, Corporations and Municipalities and similar *quasi*-public bodies and Indian States as might desire to avail themselves of its services. It also undertakes the inspection of stores purchased by various Departments of Government and Railways direct. It holds no stocks of stores of any kind. On receipt of an indent, supply is arranged either by placing separate orders for the stores with firms in India or by combining the demand with others for compliance under a 'running' or 'rate' contract. The Department levies a charge of 1 per cent. for purchase and 1 per cent. for inspection or 2 per cent. in all on the total cost of orders placed through its agency. The receipts and charges of the Department were formerly recorded under minor heads subordinate to the major heads 'XXVI' and '37—Miscellaneous Departments.' Owing to the rapid expansion of the Department and the magnitude of its transactions, separate major heads were opened, with effect from the accounts for 1926-27, to record these transactions.

XXVI and 37.—Miscellaneous Departments.

Under this head is shown the residue of the departments constituting the Civil Administration of the country. The various items classified under the four groups "Labour and Emigration", "Inspections and Tests", "Statistics" and "Miscellaneous," are enumerated in Account No. 61A. The charges on account of the Decennial Census are classified under a separate minor head "Census" under the group "Statistics".

Currency Capital Outlay not charged to Revenue . . .	62B	Capital Expenditure not charge to Revenue— Capital Outlay on the Currency Note Printing Press	422	68,632

Section G.—Currency and Mint.

This section was opened for the first time in the accounts for 1921-22 in order to bring together in one place all the financial operations connected with the currency policy of the Government of India which were formerly shown in two separate sections :—

- (1) Currency, under “Section D—Civil Departments”.
- (2) Mint, under “Section C—Post Office, Telegraphs and Mint”

Section GG.—Currency and Mint

This section includes the capital major head “56-F.—Currency Capital Outlay not charged to Revenue”.

XXVII and 38—Currency.

These two major heads record the various transactions relating to the Currency Department, which are classified under the following heads:—

RECEIPTS.

- (1) Profits on note circulation.
- (2) Premium on bills.
- (3) Value of old currency notes assumed to be no longer in circulation.
- (4) Value of unclaimed currency notes.

EXPENDITURE.

- (5) Currency establishments.
- (6) Working Expenses of the Currency Note Printing Press.
- (7) Charges for remittance of treasure.
- (8) Loss on note and specie remittances.

Of these, item (1) represents the receipts from investments on behalf of the Paper Currency Reserve: These receipts were earmarked for the reduction of created securities in the Paper Currency Reserve by the Paper Currency Amendment Act XLV of 1920. This provision has, however, been temporarily suspended by successive Indian Finance Acts since 1922, and credit for the interest during 1929-30 has accordingly been taken to Revenue. Item (2) arises in connection with the sale of supply bills between places where there is no office of the Imperial Bank. Other items call for no special explanation.

(a) Adjusted in India General books.

XXVIII and 39—Mint.**GENERAL.**

1. The Indian Mints produce, for circulation in India, silver, bronze and nickel coins. The entire coinage is a token coinage circulating at a value higher than the intrinsic value of the metal contained therein. Government therefore makes a profit on its coining operations. The net profit on silver coinage made in the past was used to build up the Gold Standard Reserve and did not enter the Revenue accounts of Government. No coinage of new silver is at present being undertaken. If it were undertaken, the resultant profit would be taken to the Revenue accounts, as the Gold Standard Reserve has attained the maximum fixed by an existing convention. The Revenue accounts receive full credit for the profits on bronze and nickel coinage under the head 'Mint.'

Accounts of a commercial nature are maintained at the Mints and annual Trading and Profit and Loss Accounts and Balance Sheets appear in the Appendix to the Appropriation Accounts of the Central Government (Civil) containing accounts and reviews of Government Commercial concerns.

REVENUE.

2. *Percentage chargeable on the coinage of new rupees.*—The net profits on new coinage of silver went in the past to the Gold Standard Reserve. To arrive at these profits, it was necessary to deduct from the face value of the coins produced not only the cost price and freight of the silver coined but also the estimated cost of production in the Mint. A fixed deduction of two per cent. on the face value of the rupees coined was made for this purpose and credited to 'Mint' as a set off against some part of the charges debited under the expenditure head. There were no receipts under this head during 1929-30.

Profit on circulation of bronze and nickel coins.—This represents the profit on the net amount passed into circulation during the year less the net loss on sale of metal and destruction of old coins. In years in which there is a net return of these coins from circulation into Government depôts, there will be no profit, but a loss which will appear under the expenditure head. The process of accounting by which this profit or loss is calculated is set forth in Account No. 63-A.

Fees for coining dollars, etc.—These are fees levied from Foreign Administrations to cover the cost of coinage undertaken for them by the Indian Mints.

Other gain on silver coinage operations.—Under this head are credited certain operative gains accruing during the process of coining silver, which are more than counterbalanced by operative losses debited under the expenditure head.

EXPENDITURE.

3. The Mint expenditure is set forth under the various descriptive heads in Account No. 63.

The head "Extra establishment and extra hours' pay" covers the cost of all temporary establishments employed in the Mints and all overtime pay whether for fixed or for temporary establishments. The number of hands employed depends almost entirely on the quantity of coinage in progress, but it does not vary in proportion to the coinage, as the greater the output up to the normal capacity of the Mint the less is the cost *per lakh*.

The charges debited to the head "Loss of weight in recoinage old coins" under "Loss on coinage" record the difference between the face value of light weight silver coins withdrawn from circulation for recoinage and the value at Re. 1 per standard tola, and represent the wear of coins put into circulation. Under "Loss of weight in coining silver" is debited the loss arising in connection with the technical operations to which bullion is subjected in the Mints. It also includes the loss due to the amount of dirt on withdrawn coins, which is weighed in at first as silver but disappears in the process of melting. The head "Cost of copper alloy" shows the cost of copper used for reducing fine silver to the fineness required for coinage.

G. and GG.—Currency and Mint.

Section H.—Civil Works Charged to Revenue.

The expenditure brought to account in this section relates to the cost of departmental buildings, communications and other works where this is treated as a charge against revenue. The outlay on such buildings and roads projects and allied works of permanent public utility as are definitely recognised as a charge against capital is dealt with in Section HH. The interest charges on the Capital expenditure on the Hydro-Electric Projects in Madras have been shown in this Section in 1929-30.

H.—Civil Works (charged to Revenue).

XXX and 41—Civil Works charged to Revenue.

Buildings and communications in the Civil Department are classified as "Civil Works" in contradistinction to "Military Works", the term applied to similar works connected with the Military Department.

2. Prior to 1921-22, a distinction was maintained throughout the accounts of Civil Works between "Works in charge of Public Works Officers" and "Works in charge of Civil Officers," the latter representing transactions of civil officers of other departments acting as agents of the Public Works Department. It was, however, recognised that the latter class of works could no longer be retained in the Public Works Accounts under the new conditions created by the Reforms. Whereas all revenue and expenditure relating to Public Works in charge of Officers of the Public Works Department must necessarily be charged to their grants, transactions connected with any building works which a Governor may assign to the departments using or requiring them must, in consonance with the rules framed under the Government of India Act, be treated as revenue and expenditure relating to the major heads under which the ordinary transactions of the departments concerned are booked. Similarly, where the administrative control of any Central Government building is formally transferred to the department using or occupying it, the connected receipts and expenditure are charged to the major head relating to the department concerned. Where, however, works the administration of which has not been transferred from the Public Works Department are by mutual arrangement executed by another department on behalf of the Public Works Department, the charges in connection with them are debited to Public Works grants.

REVENUE.

3. The receipts are comparatively small and are classified under descriptive heads in Accounts Nos. 65 and 65-A which do not call for detailed explanation.

EXPENDITURE.

4. The Local Governments execute works not only on their own behalf but on behalf of the Central Government also. Examples of the latter class are Currency Offices, Customs Houses and the like. The revenue and expenditure connected with such works are accounted for directly in the Central Section of the major heads "XXX and 41—Civil Works". In a few cases, however, such as works executed on behalf of the Military Engineer Services which have a separate budget, the Railway and the Posts and Telegraphs Departments, which are commercial departments, and the Archaeological Department in respect of works on ancient monuments, or where the buildings have been transferred to departmental control, the receipts and expenditure are recorded under the major heads relating to the departments concerned.

5. In all Governors' Provinces except Assam, expenditure on Provincial Civil Works other than the construction and maintenance of residences for Governors of Provinces and works relating to certain areas which have been declared as "Backward Tracts" is "Transferred" expenditure. The Governors of Bihar and Orissa and Burma have, however, in exercise of the powers vested in them under rule 7 of the Devolution Rules, treated the expenditure on all buildings relating to Reserved Departments as 'Reserved' expenditure.

6. The different varieties of buildings and communications constructed by the Public Works Department are exhibited in Detailed Accounts Nos. 56 and 66-A. Expenditure upon each of these classes is sub-divided into outlay on 'Original works' and on 'Repairs'. Under the former is included all new construction, whether of entirely new works or of alterations and additions to existing works; as well as repairs to newly purchased or previously abandoned buildings, which may be necessary before they can be brought into use. It also includes all substitution of one variety of work

for another, such as that of a tiled for a thatched roof to a building, where the new work represents a genuine increase in the permanent value of the property as an asset. The sub-head 'Repairs' covers all operations, other than new works, which are necessary in order to maintain in proper condition works which are in ordinary use.

7. The charges for 'Establishment' and 'Tools and Plant' are recorded under separate sub-heads for the Civil Works as a whole. The recorded charges are rough approximations only, as Public Works establishments are generally joint establishments employed on works charged under two or more heads of account. A fuller description of the method of distribution of establishment and tools and plant charges in the Public Works Department will be found on page 605.

8. The charges under 'Grants-in-aid' represent contributions given to Local Bodies for construction of buildings, communications and allied works of lasting public utility.

9. The head "Appropriation to the Road Development Fund" has been introduced in the accounts for 1928-29 to record the annual lump grants from Central Revenues to the Road Development Fund (see notes under Account No. 89-B page 640).

Civil Works	69	Expenditure	461			15,89,470
(Charged to Revenue)						

The capital major heads included in this section are :—

Not charged to Revenue.

- (1) 57—Initial Expenditure on New Capital at Delhi.
- (2) 58—Capital outlay on Hydro-Electric Schemes.
- (3) 59—Bombay Development Scheme.
- (4) 60—Civil Works not charged to Revenue.

Charged to Revenue.

- (5) 41-A.—Capital expenditure on Civil Works met out of Extraordinary Receipts. (Punjab).
- (6) 41-B.—Capital outlay on Hydro-Electric Schemes met from Revenue. (Punjab).

Of these, (1) is Central and (2) to (6) are Provincial.

2 The expenditure falling under the first group relates to special capital projects of buildings, communications or allied works of lasting public utility undertaken by the Central or Provincial Governments from resources outside the Revenue Account. The essential conditions precedent to the opening of a capital major head outside the revenue account are that the expenditure must be of a capital nature under the ordinary principles of accounting, subject in the case of Local Governments to the proviso that projects so financed must be projects for which money might be borrowed under the Local Government (Borrowing) Rules.

3. In the Punjab, where a large amount of extraordinary revenue receipts has accrued, the Local Government have decided to meet a portion of the capital expenditure recorded under the head "60—Civil Works not charged to Revenue" from those receipts, the amount being transferred to the head "41-A" within the Revenue Section of the accounts. Similarly it is intended on occasions to transfer a portion of the amount recorded under the head "58—Capital outlay on Hydro-Electric Schemes" to the head "41-B." though no such transfer was actually made in the accounts for 1928-29 or 1929-30.

57.—Initial expenditure on New Capital at Delhi.

This head was opened in the accounts for 1912-13 for the record of capital expenditure directly incurred on the construction and equipment of the permanent Capital at Delhi. The initial expenditure incurred in 1912 and 1913 and the recurring charges of subsequent years in connection with the provision of temporary accommodation for the Government of India at Delhi pending the construction of the New Capital have been charged within the Revenue Account under "Civil Works". In the same way, charges incurred in administrative and commercial departments in connection with the foundation of the New Capital are treated as departmental expenditure chargeable to the departments concerned. Thus, the expenditure on land and buildings required for the New Cantonment at Delhi and any corresponding receipts, appear under the Military heads concerned. A portion of the capital expenditure involved in the rearrangement of the Railway System adjoining the New City has been treated as capital outlay on railways. As the project is nearing completion, all maintenance charges in connection with completed sections of the project Estimate are now being debited to "41—Civil works".

The various items of expenditure, initial and recurring, falling under different major heads, as well as any receipts which form a direct set-off against that expenditure, are brought together in a *pro forma* account which is maintained to work out the net cost on account of the change of Capital.

No. 67.- ACCOUNT of INITIAL EXPENDITURE on NEW CAPITAL at DELHI during and to end of the year 1929-30.

HH.—Capital outlay on Civil Works, etc.

58.—Capital outlay on Hydro-Electric Schemes.

This head records the capital expenditure on Hydro-Electric schemes undertaken by the Governments of Madras and the Punjab. In the Punjab, the interest charge during construction of the Uhl River Project is charged to the capital account of the work.

Two new major heads, designated "XXXA Hydro-Electric Schemes" and "41-C.—Interest on Capital outlay on Hydro-Electric Schemes", have been opened in Section H of the accounts for the record of revenue and interest charges of projects which have begun to earn revenue. The first head has not been operated upon in the accounts for 1929-30

HH.—Capital outlay on Civil Works, etc.

58.—Bombay Development Scheme.

The expenditure head '59-Bombay Development Scheme' and the corresponding receipt head 'XLII-Bombay Development Scheme' were opened in the accounts for 1920-21 for the record of the transactions in connection with the large programme of development and reclamation work undertaken by the Government of Bombay for the housing of the industrial population in Bombay. The Scheme is being financed from a special loan raised for the purpose by the Local Government and from advances from the Provincial Loans Fund, supplemented by 4/7ths of the gross revenue derived from a Town Duty on raw cotton imported into the city of Bombay by sea or land from any part of India at the rate of one rupee for every bale weighing approximately $3\frac{1}{2}$ cwt.

2. The expenditure on the various projects forming integral parts of the Bombay Development Scheme is set forth in Account No. 68. As no Revenue Account has been opened for the Scheme as a whole, *pro forma* adjustments for interest on capital and cost of audit are being made in the accounts of the various sub-schemes concerned. Separate Revenue Accounts have been opened for a few sub-schemes and appear as Accounts Nos. 66-G. and 66-H. in Section H.

3. The receipts hitherto credited to the Capital receipt head 'XLII—Bombay Development Scheme' consisted mainly of (i) the proceeds of the cotton cess mentioned in para. 1 above and (ii) receipts from sale of land under control of the project. Of these, the former which are essentially of a revenue nature are now credited to the revenue head 'XXXI—Bombay, Development Scheme', while the latter are taken in reduction of the capital expenditure under '59—Bombay Development Scheme'. The head 'XLII—Bombay Development Scheme' has accordingly been abolished from 1929-30 and the receipts, credited to this head to end of 1928-29 have been transferred to the account of capital expenditure except to the extent of Rs. 1,64,18,586, a sum that represents the amount of receipts of a revenue character which have been omitted from the capital account.

4. The Development Department as a separate entity has been abolished with effect from the 1st March 1930. The necessary changes in accounting procedure are under consideration.

J. and JJ.—Miscellaneous.

Section J.—Miscellaneous.

The section covers all miscellaneous receipts and charges in the Civil Department, which are not directly attributable to any regularly constituted Department of Government. Prior to 1921-22, these transactions were grouped under "Section E—Miscellaneous Civil charges". The section as now constituted includes charges under Famine Relief, but excludes Exchange which is distributed over the different sections concerned.

Section J J.—Miscellaneous.

This section includes the capital major heads "60A—Other Provincial Works not charged to Revenue", "60 B—Payments of commuted value of Pensions" and "60 C—Capital outlay on Bombay Land Scheme". The last named was provisionally opened in the accounts for 1927-28.

43—Famine.

In consequence of the changes in the constitution of the old Famine Insurance Fund, the nomenclature of this group head has been changed from "43—Famine Relief and Insurance" to "43—Famine". Under this general heading are grouped two expenditure heads of account.

A.—Famine Relief.

B.—Transfers to Famine Relief Fund.

The transactions under these heads, together with those under the receipt head "Transfers from Famine Relief Fund", are exhibited in Accounts Nos. 70 and 87.

2. The Origin of the appropriation to Famine Relief and Insurance.

The appropriation to Famine Relief and Insurance dates back to 1878-79. In 1876 and 1877 the Government of India, reviewing the effect upon their finances of the heavy famine expenditure of several preceding seasons, found that this expenditure had in reality been met from loan funds, the ordinary revenue of the country just sufficing to meet its ordinary expenses. This state of affairs was recognised as unsatisfactory. Famine was an ordinary incident of Indian administration and should be met from current revenues. Government accordingly decided that it was desirable so to increase the revenues of India as to leave a margin from which famine charges might be met.

A careful calculation of past expenditure showed that the average annual charge on account of famine relief had amounted to about 150 lakhs of rupees, and it was therefore decided to increase the annual revenues by this sum. This amount was raised by means of a famine cess (since abolished) levied upon land, and a license tax (subsequently merged in the general Income Tax) imposed upon persons following particular trades. These taxes were imposed in 1878-79, and it was expected that their imposition would swell the surplus of the year by 150 lakhs. No provision for the expenditure of this sum was made in the estimates. It was intended to hold it in the cash balances until it could conveniently be used in paying off debt. It was not until 1881-82 that a new head "Famine Relief and Insurance" was opened on the expenditure side of the accounts, and a provision of rupees 150 lakhs made under it. This provision was, however, temporarily 'suspended' or 'reduced' on several occasions in subsequent years when Government was faced with financial stringency.

3. Method of effecting "Insurance". Appropriation for Reduction of Debt and its extension to Avoidance of Debt. It was originally intended to appropriate in each year a sum of rupees 150 lakhs to Famine Relief and Insurance, from which would be met the actual cost of famine relief incurred during the year, and also of the construction of Protective Railways and Irrigation Works up to a maximum limit of one half of the total provision, any part of the Rs. 150 lakhs that remained unspent being taken as a cumulative insurance against severe famine in the future. It was considered undesirable to pay this unspent balance into a specific fund. Government preferred to meet the famine expenditure from the general revenues and to effect insurance against such charges in the future by strengthening the general financial position of the country. Accordingly, in the early years of the scheme, the surplus funds of the provision were on several occasions employed in paying off debt. Government was, however, at that time borrowing largely for productive purposes and it was soon recognised that there was nothing to be gained by paying off old and incurring new debts simultaneously. It was decided, therefore, while borrowing continued, to appropriate the excess fund representing Famine provision to the avoidance of new rather than the liquidation of old loans. In pursuance of this policy the unexpended balance of the provision was after 1885 actually spent in each year upon productive works.

4. Incidence of Famine Expenditure before the Reforms. Prior to 1907-1908 the expenditure upon Famine Relief was a Provincial charge until provincial resources were exhausted, when the burden shifted to Central Revenues. As this system was found unsuited to the satisfactory

J. and J J.—Miscellaneous.

working of the *quasi*-permanent provincial settlements, it was decided to make famine relief at the outset a Central liability, and to call upon the provincial resources only when the expenditure became really heavy. It was accordingly decided to appropriate one quarter of the famine provision of Rs. 150 lakhs to form a species of reserve against which Provincial Governments might draw in time of famine. The sum of Rs. 37½ lakhs was then distributed among the provinces liable to famine in proportion to their comparative needs, the share allotted to each province being added to its resources by an annual assignment from Central to Provincial revenues. The credit was, however, a book credit only; a credit under the head "Transfers between Central and Provincial Revenues" being counterbalanced by a corresponding debit under the head "Reduction or Avoidance of Debt" in the Provincial section of the accounts. Under this system the Provincial allotment was regarded as of the nature of an insurance payment, in return for which any famine expenditure incurred by a province was treated as wholly "Central" within certain prescribed limits. The extent to which any local government was thus entitled to have its famine expenditure treated as "Central" was represented by its "famine credit" in the *pro forma* account which was maintained under this system. When this credit was exhausted, further expenditure was shared equally between the Central and the Provincial Government concerned. This arrangement was discontinued in 1917-18, when the Central Government's share of the famine relief expenditure was fixed uniformly at $\frac{3}{4}$ ths and the Provincial Governments' share at $\frac{1}{4}$ th. This method of apportionment remained in force till, on the advent of the Reforms, Famine Relief became a wholly provincial subject.

5. *Position under the Reforms.* Under the Statutory Rules framed under the Government of India Act as they stood up to 1927-28, each Provincial Government was required to contribute from its resources a fixed sum every year for Famine Insurance. The annual contribution was devoted in the first instance to outlay on the construction of protective works and, if necessary, on relief measures, the sum not required for these purposes being utilised in building up a Famine Insurance Fund. The balance at the credit of the fund was regarded as invested with the Central Government which paid interest on it, and it was available for application, when necessary, to any of the objects mentioned above and also to the grant of advances to cultivators.

The constitution of the Fund has undergone a radical change with effect from the financial year 1928-29. Under the new regulations the Fund has ceased to be an Insurance Fund. It is now called the "Famine Relief Fund" and it provides, as its main and primary object, for expenditure on Famine Relief proper, the word 'Famine' being held to cover famine due to drought or other natural calamities. Accordingly, the annual assignment from revenue, as well as the balances in the Fund till they exceed a certain prescribed amount, are not expended save upon the relief of famine. Loans to cultivators are not granted from the new Famine Relief Fund direct, but the Fund may advance money for financing the Provincial Loan Account if and when its balance exceeds the prescribed minimum. The balance at credit of the old Famine Insurance Fund on the 31st March 1928 was transferred to the new Fund on 1st April 1928. In Burma and Assam, where no Famine Relief Fund has been created, the balances at credit of the old Famine Insurance Fund were transferred to the general balances of the provinces.

6. The transactions of the Famine Relief Fund are exhibited in Account No. 87, which shows the balance at credit of the Fund at the end of the year 1929-30.

44.—Territorial and Political Pensions.

Under this head are recorded various pensions and charitable allowances granted, for reasons of State, to members of former Ruling Families and others.

Only pensions granted to non-officials whose services, descent, or connections are such that it is on general grounds of policy desirable that Government should extend to them some measure of assistance or recognition are classed as 'Political Pensions.' All other pensions which were treated as 'Political' prior to 1921-22 are now recorded under "Superannuation Allowances and Pensions."

XXXIII and 45—Superannuation Allowances and Pensions.**GENERAL.**

Pensions and gratuities paid from the revenues of Government fall into two main classes, according as they are paid to officers who have retired from Government service or to the surviving families of deceased officers.

2. The accounts under this head are complicated by the appearance in the books of subscriptions to a number of old Funds which have ceased to exist in so far as concerns new entrants to the departments formerly interested in them, but to which old members continue to subscribe. These abolished Funds are the Military Orphan and the Medical Retiring Funds, which have been superseded by the Indian Military Service Family Pension Fund, the accounts of which appear in the Army books; and the Bengal, Bombay and Madras Civil Funds, which have been replaced by the Indian Civil Service Family Pension Fund.

REVENUE.

3. Apart from the transactions of the abolished Funds mentioned above, the subscriptions under the Indian Civil Service Family Pension Regulations and contributions received from Foreign Governments, etc., in respect of the pensions of officers lent to them, constitute the main items of revenue under this head.

EXPENDITURE.

4. Expenditure on superannuation allowances, pensions and gratuities to retired civil officers of all departments except Railways is recorded under this head, besides the contributions to Provident and Service Funds and family pensions paid from funds merged in Government balances, including the abolished Funds mentioned above. This head is also debited with the annual equated payments to capital on account of commutations of pensions; see paragraph 6 below. Pensions to retired Military officers are charged to the Army Estimates. Pensionary charges of the Posts and Telegraphs Department are debited to the general head "45—Superannuation Allowances and Pensions" but the Department is required to make a contribution each year based, not on the actual payments made during the year, but on the pensionary liability to be met on the retirement of employees then in service. The contribution payable by the Indian Posts and Telegraphs Department during 1929-30 was tentatively fixed at Rs. 60 lakhs, besides Rs. 1,25,000 payable by the Indo-European Telegraph Department, and these amounts have been charged to the Posts and Telegraphs Department by credit to this head. An analogous procedure is also followed in the case of the Irrigation, Northern India Salt Revenue and other Commercial departments except Railways, and in these departments the pensionary charges debitable to the Commercial heads of account are computed at a percentage on establishment charges, while the actual pensions are charged to this head. In Railways in which the number of pensionable officers is very small, the actual payments are charged to that Department.

45A—Commutation of pensions financed from ordinary revenues.

60B—Payments of commuted value of pensions.

5. These capital major heads have been introduced for the adjustment of payments on account of commutations of pensions which were formerly charged to the head '45-Superannuation allowances and Pensions' in the Revenue section of these accounts.

6. All payments on account of commutations of pensions whether made in England or in India, including payments made to other Governments, are brought to account, in the first instance, under the head "60B—Payments of commuted value of Pensions," which is a capital head, outside the Revenue Account, in the books of the Central or the Provincial Government, as the case may be, and at the end of the year such portion of the expenditure recorded under this head as the Government concerned may decide to charge against current revenues is transferred to the capital major head "45 A—Commutation of pensions financed from ordinary revenues".

The net amount debited to the Capital Major head "60B—Payments of Commuted value of pensions", after deducting therefrom the recoveries, if any, from other Governments, is repaid from revenue either in a lump sum or by a system of equated payments, spread over 15 years, which include interest on the capital invested. Such equated payments are charged to the head "45-Superannuation Allowances and Pensions" or other appropriate major head in the Revenue section of the Accounts, by credit to (a) the capital head "60 B—Commuted Value of Pensions" for the capital portion of the payments, and to (b) "19-Interest on Ordinary Debt" for the interest portion.

XXXIV and 46.—Stationery and Printing.**REVENUE.**

This is essentially an expenditure head and the revenue recorded in the accounts is rather a set-off against some part of the charges than an independent source of income.

EXPENDITURE.

The Commercial Departments, such as the Railways, Posts and Telegraphs and the Northern India Salt Revenue, and, when it exists, the Census Department, pay for their own printing and stationery. The Military Department also is since 1925-26 being charged with the cost of stationery supplied and printing work done. In the case of other departments of Government, whether Central or Provincial, expenditure on stationery and printing, except for petty purchases of indigenous stationery, is usually brought to account under the present head.

2. The bulk of the stationery is purchased in the first instance for the Central Stores which are maintained in Calcutta. The cost of all such purchases, whether made in India or in England, is debited to the Central Government. It is not until the stores are actually issued to Provincial Governments or to Central Departments which have to pay for their supplies that the debits are passed on to the provincial or departmental accounts. The recoveries effected from the paying departments of the Central Government are adjusted by reduction of the Central expenditure on purchase of stationery, which accounts for the *minus* entries in Account No. 73-A; while the recoveries from Provincial Governments are shown under the receipt major head "XXXIV-Stationery and Printing".

3. The Stationery Stores maintained in Madras and Bombay were taken over by the Provincial Governments with effect from the 1st April 1922 and Provincial Stores were opened in Burma and Bihar and Orissa with effect from the 1st April 1923. The recovery from other Governments for cost of stationery supplied by Provincial Stores are shown under the receipt major head 'XXXIV—Stationery and Printing'.

4. A new system based on costing principles was introduced in the accounts of Government Presses with effect from 1924-25. Under this system, in addition to the actual cash expenditure on the different sections of the Presses, indirect charges such as pension payments, interest on capital outlay and depreciation on buildings, etc., are worked out and distributed over these sections so as to arrive at the true cost of each section. A Depreciation Reserve Fund has also been opened except in Bihar and Orissa, to which depreciation calculated on the value of the plant, machinery and furniture in use in the Presses during each year is credited, as also the book value of plant, machinery and furniture disposed of during the year. This fund bears the cost of all machines, etc., replaced during the year. Account heads have been opened in the Finance and Revenue Accounts to exhibit the expenditure in greater detail under each head and under the different sections of the Press and other branches unconnected with the Press proper. The credits to the depreciation fund during each year and the expenditure on renewals and replacement of plant and machinery out of the fund during the year are also shown separately. Departmental charges such as Interest on capital expenditure, pensions, leave charges paid out of India, audit charges, etc., are also detailed.

60C.—Capital outlay on Bombay Land Scheme.

This capital major head has been provisionally opened from the accounts for 1927-28, for the adjustment of amounts payable to the Government of Bombay for reclaimed lands at Colaba taken over by the Government of India for the use of the Military Department. It was intended to pay for this land out of the sale-proceeds of certain properties held by the Military Department in Bombay, but, in view of the general fall in land values, it is impossible to dispose of these properties to advantage. The total sum payable to the Bombay Government amounts to Rs. 2-26 crores and the payment will be made by cancelling an equivalent amount of loan taken by that Government from the Government of India. The whole question is still under the consideration of the Government of India, and the adjustment under the Capital head in the accounts for 1927-28 was made without prejudice to any final decision that might be reached on the several financial and administrative questions involved. There were no adjustments under this head in the accounts for 1928-29 and 1929-30.

XXXVI and 48—Army.

Army accounts are naturally concerned primarily with expenditure, any revenue that accrues being incidental only and forming an insignificant set-off against military charges. The fact is fully recognised in the system of accounts which now prevails. Army expenditure is distributed over a number of main heads, as far as possible according to the services to whose maintenance it is devoted. This plan is also followed in the case of revenue, which is credited to receipt heads numbered to correspond with the expenditure heads.

2. The Army transactions are primarily classified under 'A—Standing Army', 'B—Auxiliary and Territorial Forces' and 'C—Royal Air Force', the first being sub-divided into main Heads which are detailed in Accounts Nos. 75-A and 75-B. The second and the third Heads have been opened with a view to showing these charges separately from those of the 'Standing Army'.

3. Prior to 1921-22, the Army transactions were classified under two main Divisions, Effective and Non-Effective, the former being sub-divided into eighteen Grants and the latter into two Grants. The system of accounting then in force was directed mainly to recording the cash expenditure and cash receipts under the several Grant Heads, and no attempt was made to allocate the expenditure or the value of stores consumed to the various services of the Army. A new system of account was introduced with effect from 1921-22 to show, as far as possible, the true cost of the various services inclusive of the cost of stores consumed. This system has, however, been abandoned and a reversion has been made to the cash basis system with effect from 1927-28. No distribution over the several main heads of the cost of stores consumed has therefore been made in the body of these accounts. Under the cost accounting system the transactions relating to the movements of stores were exhibited under the respective service heads but, as the heads relating to stores transactions have, from 1st April 1927, been eliminated from the accounts owing to the introduction of the cash basis system, a separate statement showing the value of opening and closing balances of stores and their movements has been attached to these accounts as appendix I.

In order that the total cost of maintaining the various services and departments of the Army may also be available in one place as in previous years, another statement showing the expenditure (including the value of stores issued and services rendered) incurred in India on those services and departments is published as Appendix II to these accounts.

4. The expenditure on buildings, roads, defence and other works for the Army is brought to account under the head '50-Military Engineer Services.' The works transactions of the Royal Air Force and those of the Army Ordnance Factories and Military Farms are, however, being recorded under Head '48-Army' with a view to the exhibition in one place of the entire transactions in connection therewith.

5. The transactions are set forth in abstract under the several Army 'Heads' in Accounts Nos. 75-A and 75-B for receipts and expenditure respectively. These accounts are followed by detailed accounts 75-C and 75-D for receipts and expenditure, respectively, which give the figures Head by Head under the principal descriptive headings. A brief description of each of the Heads is given below:—

*Transactions in India.***Part A.—Standing Army.**

HEAD I. *Fighting Services.*—This is the most important head, covering all charges in connection with pay and allowances and incidental and miscellaneous expenses of the various fighting units constituting the standing Army of India.

K.—Military Receipts and Services.

HEAD II. *Administrative Services.*—Under this head are recorded the charges connected with the various ancillary units and other subsidiary establishments maintained for the service of the Army in India. These consist chiefly of the cost of military training and education of soldiers, British and Indian; of the supervision and working of military hospitals, Supply Companies and Depôts, Remount Depôts and Arsenal; of the cost of Military Account and Audit Offices, including the office of the Military Accountant General; of the pay and allowances of chaplains, priests and ministers of religion attached to the Army and other miscellaneous charges such as the administration of cantonments, cost of recruiting staff, etc.

HEAD III. *Manufacturing Establishments*—Charges relating to the several manufacturing establishments of the Army are brought to account under this head. They comprise mainly expenditure on account of medical store depôts, factories and farms, etc., which supply medical stores and produce munitions of war, equipment, fodder, etc., for the Army.

HEAD IV. *Army Headquarters, Staff of Commands, etc.*—This Head practically corresponds to the head 'General Administration' on the civil side and records chiefly the cost of the Army Headquarters, including the Commander-in-Chief and his staff, as also the headquarters staff of the Military Commands and of the several Districts and Brigades. The cost of the Army Department and the Military Finance Branch of the Government of India Secretariat is, however, charged to the Civil Department under 'General Administration.'

HEAD V. *Purchase and sale of stores, equipment and animals.*—This Head is intended for the reception of charges connected with the purchase of varieties of military stores, including animals, required for the Army.

HEAD VI. *Special Services.*—The charges brought to account under this Head relate to special campaigns, missions and other extraordinary measures debitable to Indian Revenues. The extra expenditure only connected with these measures is debited to this Head.

HEAD VII. *Transportation, Conservancy, Hot Weather Establishments, etc.*—The charges under this Head consist mainly of the expenditure in connection with the movement of troops and stores, travelling allowances and sea passages on account of officers and others, conservancy and hot weather establishments, etc. Certain miscellaneous charges such as compensation for losses, etc., are adjusted under this head.

HEAD VIII. *Non-Effective Charges.*—Non-effective charges consist in the discharge of liabilities in connection with individuals who no longer serve in the Army, and are practically restricted to the payment of pensions and gratuities but rewards for military services which frequently involve disbursements to officers and men actually serving in the Army are on account of their general similarity to pensions and gratuities, also classified as non-effective charges.

The two main classes of pensions are: (1) retired, wound and invalid pensions and (2) family pensions. Pension contributions in respect of officers and others recovered from the Colonial and Foreign Governments are credited as Army receipts. Rewards for Military services include besides the cost of decorations, medals, etc., the cost of annuities and gratuities granted for meritorious services.

Part B.—Territorial and Auxiliary Forces.

All charges (except conservancy charges which are adjusted under Part A Head VII) relating to the Territorial and Auxiliary Forces, including the cost of supervision at Army Headquarters and at Headquarters of Commands and Districts are debited to this head.

Part C.—Royal Air Force.

The charges under this Part cover all expenditure upon supervision, maintenance, equipment, buildings, etc., of the Royal Air Force.

Transactions in England.

The bulk of the outlay in England is debited to Heads I, II, III, V, VII and VIII and Part C. Under Head I there are heavy charges on account of payments to the Home Government in connection with disbursements made by the War Office in respect of His Majesty's British Forces serving in India; and further outlay in the shape of furlough and other allowances paid to officers and men in England. Furlough and leave allowances of Indian Army Service Corps, Medical, Veterinary and Ordnance Officers and of Civilians employed in the various departments of the Army appear mainly under Head II. The expenditure under Head III represents mainly the cost of medical, ordnance, clothing, etc., stores purchased for Medical Store Depôts and Factories. The value of stores purchased for the mechanical transport and arsenals and clothing depôts, etc., is exhibited under Head V. The value of clothing and ordnance stores brought to India by troops is also adjusted under this head. The charges under Head VII mainly consist of outlay on the conveyance of troops to India. Contribution to the Imperial Government in respect of Military charges for Aden has also been shown under this head: The heavy charges under Head VIII 'Non-effective Charges' relate chiefly to pensions of European officers and soldiers who have served in India and their families. There are heavy charges under Part C on account of payments made to the Air Ministry and marriage allowances and allotments paid in respect of Royal Air Force personnel serving in India and on account of stores for aviation purposes purchased for India.

Heavy receipts in England occur chiefly under Heads VII and VIII. A contribution of £130,000 on account of the extra cost of the transport of troops due to the introduction of short service in the British Army is credited to Head VII. Subscriptions to the Indian Military Service Family Pension Fund, when received in England, and contributions paid by the Imperial Government in respect of pensionary charges of Indian troops serving overseas etc., are taken to Head VIII.

XXXVII and 49--Marine.

Under these heads are included the transactions of the Royal Indian Marine Department.

REVENUE.

The main items of revenue ordinarily occur under the heads (1) 'Dockyard Services and Supplies,' and (2) 'Hire of vessels'. The amount under (1) represents mostly receipts on account of work done by the Royal Indian Marine for other departments, Local Governments and the Royal Navy. The heavy receipts under 'Other Items' in the accounts for 1929-30 are chiefly due to the drawings from the Kidderpore Dockyard Suspense Account for expenditure on purchase of ships and vessels.

EXPENDITURE.

The main headings of expenditure are enumerated in the Abstract Account No 76-B.

The expenditure debited in the Home Accounts is mainly on account of (1) an annual contribution towards the expenses of His Majesty's Ships employed in the Indian Seas, (2) Marine stores and (3) Pensions and Furlough Allowances of the Royal Indian Marine Service.

XXXVIII and 50—Military Engineer Services.

The buildings, roads and other works required for purposes of the Army and the defence of India, and the receipts connected therewith, are dealt with under this head, which bears the same relation to the head "Army" as the head "Civil Works" bears to other civil heads of expenditure. Prior to 1906-07, the Military Engineer Services formed an integral part of the Public Works Department.

2. The details of receipts are exhibited in Account No. 77. The different varieties of Military Works of a capital nature are exhibited in Account No. 77-B., while expenditure on the repair and maintenance of these works and other miscellaneous charges which are not of a capital nature are shown in Account No. 77-C.

Military Reserve Fund.

The stabilised military budget system introduced from 1928-29, as originally arranged, provided for a total net expenditure on the Military Services for the period 1928-29 to 1931-32 of Rs. 220 Crores, *plus* such sums as may be required annually for the expansion of the Territorial Forces in accordance with the recommendations of the Shea Committee. The Military budget for any particular year of the period was not to exceed Rs. 55 crores, *plus* the realised savings of previous years, *plus*, again, the sum required in that year for the expansion of the Territorial Forces. This arrangement was modified in the budget for 1930-31; the system was given one year's longer life but at the same time the annual military budget figure apart from realised savings and amounts required for the Territorial Forces was refixed at Rs. 54·20 crores, so that for the years 1930-31 to 1932-33 the basic figure in the stabilised military budget system will be Rs. 54·20 crores. Any savings accruing within the annual allotments of 55 or 54·20 crores will, pending utilisation in the later years of the period, be carried to a suspense account. The sums allotted for the expansion of the Territorial Forces in 1928-29 and 1929-30 were Rs. 10 lakhs in each year.

The net savings accruing in the accounts for 1929-30 within the allotment of Rs. 55·10 crores amounted to Rs. 13,41,222, and this sum has been transferred to the new Central Ledger Head "Military Reserve Fund" under Section "P Deposits and Advances" by debit to the major head "50-A-Transfers to Military Reserve Fund". Transfers from the Fund to the Military accounts will be brought to account through the Major head "XXXVIII-A.-Transfers from the Military Reserve Fund" opened for the purpose.

1929-30.

**Section L.—Provincial Contributions and Miscellaneous Adjustments
between Central and Provincial Governments.**

MAJOR HEAD.	No. of Account.	DETAIL OF ACCOUNTS.	Page.	AMOUNT OF EACH ACCOUNT.	
				MAJOR HEAD TOTAL.	
				Central.	Provincial.
Contributions to the Central Government by Provincial Governments.	78	Contributions to the Central Government by Provincial Governments.	596	R ...	R ...
Miscellaneous Adjustments between Central and Provincial Governments.	79	Miscellaneous Adjustments, etc.	597	+3,011	—3,011
		Total		+3,011	—3,011

1. This section comprises two separate major heads:—

- (i) Contributions to the Central Government by Provincial Governments.
- (ii) Miscellaneous adjustments between Central and Provincial Governments.

The former head hitherto recorded the contributions payable by the Provincial Governments to the Central Government under rule 18 of the Devolution Rules. In view of the complete and final remission of the Provincial contributions with effect from the year 1928-29, it is now confined to contributions, if any, levied by the Governor General in Council under rule 19 of the Devolution Rules.

The second head records such miscellaneous adjustments between the Central and the Provincial Governments in respect of services rendered or contributions made by the one to the other as cannot conveniently be exhibited under the appropriate service heads. The principle of making such adjustments under the appropriate service heads has been rigidly applied from the accounts for 1927-28, with the result that most of the adjustments previously effected through this head are now made under service heads.

2. In these accounts, transfers between the Central and Provincial Governments are shown as *plus* and *minus* entries on the receipt side, since the transactions represent a *transfer* of revenue from one Government to another. This method of exhibition differs from that followed in the purely Central and Provincial accounts published in the respective Budgets, in which the figures are exhibited as receipts and payments.

This section, with the two major heads 'XL—Extraordinary Receipts' and '52—Extraordinary Payments', was opened for the first time in the accounts for 1923-24 for the record of special receipts and charges of a non-recurring character which it may be desirable to distinguish from the ordinary revenues and expenditure of the Central and Provincial Governments. They do not include receipts of a capital nature connected with expenditure already debited to a capital head, which are recorded by deduction from expenditure debited under that head. Two additional major heads were provisionally opened in this section to exhibit in the Revenue Account the transfers to and from the Revenue Reserve Funds created by the Government of India and the Government of the Punjab—*vide* Note on Revenue Reserve Fund, page 657. These major heads in the Revenue Section, as well as the head "Revenue Reserve Fund", may possibly be discontinued from 1930-31.

Public Works Tools and Plant ordinary	81	„	609	...	36,96,308
					6,67,63,700

Establishment and Tools and Plant charges in the Public Works Department and the method of distribution thereof among the various major heads.

Establishments employed by the Public Works Department are generally joint establishments employed on works charged under two or more major heads. The establishment charges of a Public Works division or office are in the first instance recorded under a single major head under which the division or office is classified for the purpose. At the end of the year, they are distributed amongst the various accounts which record the expenditure of the Public Works Department, in proportion to the works expenditure under each head affected. Any special establishment which is wholly employed on a work is, however, entirely charged to that work and is not included in these *pro rata* calculations. Similarly the cost of purely revenue establishments employed entirely on the management of irrigation or navigation works and the like or on the assessment, etc., of connected revenue, is charged direct to the Irrigation revenue account.

2. Similar remarks apply to the charges on account of ordinary tools and plant used in the Public Works Department. The cost of special tools and plant, by which is meant tools, plant or machinery obtained to meet the special requirements of a particular work or project, is treated as a direct charge to the work or project concerned.

N. to W.—Debt, Deposits and Advances.

Section N.—Public Debt.

The Public Debt of India may be discussed under the following headings:—

- (a) The debt of the Central Government.
- (b) The debt of the several Provincial Governments.
- (c) The classification of the debt.

Public Debt of the Central Government.

2. The Public Debt of the Central Government is divided in the accounts into two classes, (a) Permanent and (b) Floating Debt. 'Permanent Debt' includes all debt which, at the time when it is raised, has a currency of more than twelve months. The term 'Floating Debt' is applied to borrowings of a purely temporary nature, such as treasury bills and ways and means advances from the Imperial Bank or the Gold Standard Reserve with a currency of not more than twelve months.

3. The Public Debt of the Central Government consists of rupee loans raised in India and sterling loans raised in England. At the end of 1929-30, the rupee loans bearing interest amounted in round figures to Rs. 4,70 crores and the sterling loans to £364 million, or a total interest-bearing debt of Rs. 9,55 crores if the sterling figures be converted into rupees at the rate of 1s. 6d. the rupee. The sterling debt includes £18,500,000, £3,500,000 and £1,250,000 on account of Debenture Stock of the East Indian Railway, the Great Indian Peninsula Railway and the Burma Railway Companies, the liability in respect of which was assumed by the Secretary of State on the termination of the contracts with the Companies on the 1st January 1925, the 1st July 1925 and the 31st December 1928, respectively, and also £51,858,611 on account of the balance of the capital liability involved in the purchase of Railways under redemption by Annuities, which was transferred to General Revenues on the separation of Railway finances from the general finances of the Government of India. There is, besides, a small balance of rupee debt not bearing interest, amounting to Rs. 30,52,025, which represents the unclaimed balance of old loans which have been notified for discharge and have ceased to bear interest from the due date of discharge. The amounts unclaimed are usually retained in the accounts of Government as debt for twenty years from the date of discharge of the loans; after this period the unclaimed balances are written off the debt account by credit to Revenue, payments of amounts subsequently claimed being also charged to Revenue. Similarly, the balance of £153 under 'Debt not bearing Interest' in England represents the balance of India 7 per cent. Stock which remained unredeemed through the failure of the holders to return to the Bank of England the forms of application issued to enable them to secure payment.

4. Funds are also raised by the Secretary of State by the issue of Debentures through Railway Companies working State lines. The interest on these is guaranteed by the Secretary of State, but they are not in the nature of direct obligations incurred by him and are not therefore included in the Public Debt of the Government of India. The funds raised in this manner to end of the year 1929-30 are shown in Account No. 25-A.

Public Debt of Provincial Governments.

5. Under the borrowing powers conferred on them by Section 30 (1a) of the Government of India Act, 1919, the Local Governments are empowered to raise loans in the open market, a privilege which was, prior to the Reforms, reserved to the Government of India. The purposes for which and the conditions under which loans may be raised by Local Governments are laid down in the Local Government (Borrowing) Rules. Up to the end of 1929-30 three Local Governments only the Governments of Bombay, the United Provinces and the Punjab, raised loans in the open market in exercise of these powers.

6. Rule 3 of the Local Government (Borrowing) Rules confers on the Government of India such powers as are necessary to secure the co-ordination of public issues of the several Governments in India and to minimise the disadvantages of competition between the various borrowing authorities.

In cases where it is considered impolitic for a local Government to raise a loan in the open market or where a local Government has not the advantage of a borrowing market of its own, the Central Government generally comes to the assistance of the local Government by the grant of advances from its own resources.

Up to 1924-25, the advances granted by the Central to the Provincial Governments were recorded in the accounts under the head "Section S—Loans between Central and Provincial Governments". The amounts advanced by the Government of India were debited to this head in the Central section of the account by corresponding credit to an identical head in the Provincial section. Similarly, repayments by Provincial Governments were credited as receipts in the Central section by corresponding debits to that head in the Provincial section of the accounts. Thus for every entry in the Central section, there was a corresponding entry in the Provincial section of the account. The liabilities of each Government in respect of advances from the Government of India were shown in Account No. 82A, and on the assumption that the advances came out of the general borrowings of the Central Government the outstanding liabilities at the end of each year were deducted in Account No. 82 from the total debt of the Government of India in order to arrive at the *net* debt of the Central Government.

Since the establishment of the Provincial Loans Fund with effect from the 1st April 1925 (see page 629), all transactions between the Central and Provincial Governments are passed through the accounts of that Fund. The outstanding liabilities of Provincial Governments to the Government of India on 31st March 1925 were also transferred to the Fund on the 1st April 1925.

The institution of the Provincial Loans Fund necessitated certain important changes in the accounting arrangements, which are described below :—

- (1) As explained above, the outstanding liabilities of the provinces to the Government of India were previously deducted from the total debt of the Central Government in Account No. 82, and the net debt of the Central Government was then distributed between "Debt utilised for Commercial Departments" and "Ordinary debt" in Account No. 82B. One of the objects underlying the constitution of the Provincial Loans Fund is to secure that the debt of the Provinces should be clearly distinguishable from the debt of the Central Government, instead of being included with it, as formerly, in a single set of accounts. It has therefore been decided to omit the *deduct* entry in Account No. 82, and to treat the advances by the Government of India to the Provincial Loans Fund as a separate division of the Public Debt of the Central Government in Account No. 82B.
- (2) Up to 1924-25, Account No. 82A included loans raised by Provincial Governments in the open market as well as advances from the Government of India. This method of exhibition was adopted in order to bring together in one account the total indebtedness of the Provinces. As, however, the liabilities to the Provincial Loans Fund cannot be strictly regarded as Public Debt of the Provincial Governments, the form of Account No. 82-A has been so revised as to confine it to loans raised by the Local Governments in the open market, the transactions of the Provinces with the Provincial Loans Fund being shown in the same detail as hitherto in Part III of Account No. 86-A. The total indebtedness of the Provincial Governments is shown in Account No. 82-B, in which loans raised in the open market and advances from the Provincial Loans Fund are brought together.

N. to W.—Debt, Deposits and Advances.

Classification of Public Debt.

7. The bulk of the debt of India has been raised for the construction of Railways and Irrigation Works, the yield of which normally exceeds the interest payable on the corresponding portion of the debt. Accordingly, the debt of India was, prior to 1921-22, classified in the Finance and Revenue Accounts as (1) Railway Debt, (2) Irrigation Debt, and (3) Other Debt, to which two other divisions were added in recent years, (4) New Capital at Delhi and (5) Bombay Development Loan. Of the above, items (4) and (5), except that section of the Bombay Development Scheme for which separate Revenue Accounts have been opened, cannot strictly be regarded as separate divisions of the Public Debt, as no interest has hitherto been charged to the accounts of these projects in respect of the capital expended thereon. On the other hand, new divisions have come into existence owing to the application of borrowed funds to capital expenditure in the Posts and Telegraphs and other Commercial Departments of the Central Government, and to capital works undertaken by Provincial Governments as a result of the borrowing powers conferred on them under the Reforms Scheme. The Statement regarding classification of debt has therefore been recast so as to show in respect of each Government :—

- (1) The total debt.
- (2) The expenditure debited to the capital accounts of Commercial Departments (including investments in Government Commercial Undertakings).
- (3) The excess of (1) over (2), known as " Ordinary Debt ".

The calculation of the figures of capital debited to Commercial Departments is shown in account No. 82-B., that relating to Railways, which is rather complicated, being detailed in foot-note (a) to the account.

The amounts entered as capital debited to Commercial Departments include all actual outlay in those departments provided from Government sources, whether it has been financed from loans raised by Government or otherwise. The following are the sources, apart from loans, from which such capital outlay is financed .—

- (1) Ordinary Revenue.
- (2) Surplus cash balances
- (3) Savings Bank deposits.
- (4) Net receipts under other deposits and advances.

8. It follows from the foregoing explanation that the funds devoted to capital expenditure in any year ordinarily exceed the money raised for the purpose, and that the actual method explained above of calculating the amount of debt utilised for Commercial Departments results in a gradual increase of this amount and an equivalent decrease in the unproductive debt corresponding roughly to the extent to which funds raised otherwise than by borrowing are devoted to capital outlay on commercial undertakings. The operation is reversed in years in which, owing to unfavourable financial conditions, funds obtained by loans are used in the ordinary disbursements of Government.

No. 82.—ACCOUNT of the GOVERNMENT of INDIA, showing the ADDITIONS to, and DISCHARGE OF, DEBT, during the Year ended 31st March 1930, and the amount of DEBT at the commencement and close of the Year.

N. to W.—Debt, Deposits and

Section O.—Unfunded Debt.

The term 'Unfunded Debt' in the Government accounts is applied to a number of interest-bearing obligations relating to funds deposited with Government for various purposes. These are:—

Special Loans.—The bulk of the obligations recorded under this head relates to endowments made by the late King of Oudh for the payment of pensions and stipends to his dependants. The British Government has guaranteed these payments and allows interest at rates which were fixed when the endowments were created. The remaining items consist generally of endowments for specific purposes of a religious or charitable character, such as the maintenance of choultries for travellers, asylums for the poor, etc., which were accepted by Government from private persons at various times.

Treasury Notes.—The main item under this head relates to certain endowments for temples, the liability for which was taken over by the British Government when they acquired the territory of the Bhonsla Rajas of Nagpur. About 1865 the Government decided to issue treasury notes in respect of the capital of the endowments and to pay the annual grants in the form of interest on these notes.

Service Funds.—These represent the balances of certain funds intended for the benefit of Government servants but not under the control of Government, which are allowed to deposit their funds with Government on favourable terms as to interest. The funds of this character at present in existence are the Uncovenanted Service Family Pension Funds in Bengal and Bombay, the Madras Military Assistant Surgeons' Fund and the Bengal and Madras Service Family Pension Fund. The Indian Military Widows' and Orphans' Fund and the Superior Services (India) Family Pension Fund, though under Government control, are classed under this group for the sake of convenience.

Saving Banks Deposits and Special Accounts.—The items included under this head may be classed as follows:—

- (i) Post Office savings banks, *i.e.*, savings banks established at Post Offices throughout the country with a view to encouraging thrift among the ordinary public. Deposits are received into them subject to certain limitations and bear interest at a fixed rate, at present 3 per cent.
- (ii) Post Office Cash Certificates, *i.e.*, certificates issued for money paid into the Post Office, the money being returnable at the end of five years with bonus working at the rates in force during 1929-30, to an average yield of about $5\frac{1}{2}$ per cent. per annum at compound interest. The principal is also repaid on demand at any time within the five years, but without a bonus during the first year and at a bonus based on a reduced rate of yield from the second year till the maturity of the certificates.
- (iii) State provident funds, *i.e.*, funds established for the benefit of Government servants including those of State and Companies' Railways. Deposits are compulsory for certain classes of servants and optional for others. Interest on deposits is allowed at favourable rates, and, in the case of railways, the deposits by the employees are supplemented by contributions from Railway funds. The accumulated deposits are paid to the depositors on the termination of their service with Government and temporary withdrawals are permitted in the interval in certain circumstances.
- (iv) Funds of certain provident associations (mostly under private management) which Government has consented to receive at savings banks rates of interest. Among these funds may be mentioned the General Family Pension Fund, the Hindu Family Annuity Fund, the Bengal Christian Family Pension

Fund and the Postal Insurance and Life Annuity Fund. The last of these is a Life Insurance Fund under Government management for the benefit of its servants, in which assurances are permitted up to a maximum of Rs. 10,000 for each life assured.

- (v) Other items.—In connection with the purchase of the Southern Punjab Railway Company and the postponement of a part of the liability at 3 per cent. interest in accordance with the terms of the contract, the whole purchase price (£5,256,631-8-0) has been, for Railway purposes, treated as having been paid during 1929-30, the year in which the Railway became the property of the Government of India, the postponement of instalments being regarded as a matter concerning the General Revenues of India rather than the Railway Department. The deferred instalments have, under this arrangement, been brought to account under this head in the accounts of the Secretary of State for 1929-30; see Account No 86.

Section P.—Deposits and Advances.**PROVINCIAL LOANS FUND.****Section S.—Advances from Provincial Loans Fund.**

The Provincial Loans Fund was established with effect from the 1st April 1925, to concentrate all loan transactions between the Central and Provincial Governments in a separate self-supporting Fund, altogether independent of the Central Government debt, and to systematise the arrangements for administering these transactions. All advances granted by the Government of India to Provincial Governments are now made through this Fund and the terms on which advances granted for various purposes are to be repaid have been standardised for all provinces alike. Definite principles have been laid down to regulate the purposes for which advances may be made to Provincial Governments and the rates of interest to be charged thereon. Prior to the institution of this Fund these advances used to be brought to account through the head 'Loans between Central and Provincial Governments' (See page 613).

2. The Fund is now administered by the Government of India and its transactions are included in the accounts of the Central Government, though with future developments the administration of the fund may possibly be transferred to an independent body corresponding to the National Debt Commissioners in England, the Fund being then constituted as an entity entirely independent of the Government of India or of any Province.

3. All capital liabilities of the Provincial Governments to the Government of India on the 31st March 1925 were transferred to the Fund on 1st April 1925. Funds required for the purpose of new advances to Provincial Governments are advanced to the Fund by the Government of India, from time to time, as required, and these, together with the repayments falling due on account of previous loans, constitute the capital of the Fund. The Capital Account is also credited or debited with any surplus or deficit, as the case may be, in the Income Account at the end of each year after payment of interest to the Central Government and other expenses. Any surplus in the capital of the Fund which may not be required for the time being for the purpose of new advances, may be utilised towards the reduction of advances previously made to it by the Government of India under such conditions as may be determined by the Government of India according to the circumstances of the case.

4. The income of the Fund consists mainly of interest received from Provinces on advances made to them out of the fund and of such interest as may be derived from invested capital. The charges against the Income Account are chiefly payments of interest to the Central Government. This account is also to be credited with gains or debited with loss on the realisation or revaluation of securities in which any portion of the Fund may be temporarily invested.

5. The receipts into, and disbursements from, the Fund are recorded in the Government Accounts under the head 'Provincial Loans Fund' in 'Section P.—Deposits and Advances, etc.' The transactions of the Fund have been exhibited in these Accounts in three parts, I—Income Account, II—Capital Liabilities Account and III—Capital Assets Account. The balance at credit of the Fund in the Government account at the end of the year is represented by the figure shown against the head 'Cash' in part III of the Account.

Appropriations for Reduction or Avoidance of Debt.

The credits brought to account under this head are divided into three categories:—

- (a) Sinking Funds for Central Loans.
- (b) Sinking Funds for Provincial Loans.
- (c) Other Appropriations.

2. As explained in the Note on '21—Reduction or Avoidance of Debt,' under 'Section E—Debt Services' (page 315), the heads (a) and (b) are credited with the amounts set apart each year for the Sinking Funds created for Central and Provincial loans by charge to the Revenue expenditure head '21—Appropriation for Reduction or Avoidance of Debt' (see Account No. 45), and are debited with charges connected with redemption of debt either by purchase and cancellation or by direct discharge. On actual cancellation of the stock, the nominal value of the cancelled securities is shown as debt discharged in Accounts Nos. 82 and 82-A.

The nature of transactions under '(c) Other Appropriations' has been explained in the Note under '21—Reduction or Avoidance of Debt'.

Sinking Fund Investment Account.

Pending utilisation for the purposes for which the Sinking Funds have been created, the amounts standing at credit of Sinking Funds of the Central and Provincial Governments have been invested in Government of India Securities. The amounts expended in the purchase of these securities have been taken to a separate head 'Sinking Fund Investment Account', while the interest accruing from the investments has been credited to the Sinking Funds concerned.

No. 89B.—ACCOUNT of the ROAD DEVELOPMENT FUND for the Year 1929-30.

As a result of the recommendations of the Indian Road Development Committee, both the excise and the import duties on motor-spirit have been raised from four to six annas per gallon with effect from the 1st March 1929, the additional revenue being earmarked for credit to a Road Development Fund, from which grants will be made to Provincial Governments and others for expenditure on road development. The entire proceeds of the additional duties are credited to the head "1.—Customs", but a corresponding amount is charged to the head "41—Civil Works—Appropriation to Road Development Fund" by *per contra* credit to the Central Ledger Head "Road Development Fund" under Section "P.—Deposits and Advances—not bearing interest". There were no disbursements from the Fund during 1928-29 and 1929-30.

N. to W.—Debt, Deposits and Advances.

No. 90-A.—STATEMENT showing the APPROPRIATIONS for the REDUCTION of CREATED SECURITIES in the PAPER CURRENCY RESERVE AND the APPLICATION thereof, in the year ended the 31st March 1930.

The Paper Currency Reserve was established to secure the convertibility of currency notes. This reserve is entirely separate from the Treasury balances.

The term 'created securities' is applied to securities created by the Government of India for issue to the Paper Currency Reserve, as distinguished from securities purchased in the open market. Under the permanent constitution of the Paper Currency Reserve, the amount of 'created securities' that can be held in the Reserve has been fixed at a maximum of Rs. 12 crores, and with a view to securing that the present holding of such securities in the Reserve is reduced within a reasonable period to the amount permissible under the permanent provisions of the Paper Currency Act, it was provided that the interest derived from securities in the Paper Currency Reserve should be applied from the 1st of April 1921 to the reduction of these securities. This provision has, however, been temporarily suspended by successive Indian Finance Acts since 1922.

The debit balance represents the value of created securities cancelled in excess of amounts appropriated for the purpose to the end of 1925-26. The question of the adjustment of the debit balance is under the consideration of the Government of India.

Profit and loss on Rupee Coinage.

The silver purchased for coinage is for convenience placed in the Currency Reserve, generally on delivery to the Secretary of State in London or on shipment to India, and remains there during the progress of coinage. Payments for the silver purchased (whether in England or elsewhere) are usually made out of the Home Treasury cash balances and charged in the Home Accounts under the head 'Remittance Account between England and India'. The response to this head is given in the Indian Accounts when the opposite payment is made from the Currency Reserve to the Treasury. This is done on receipt of intimation from the Secretary of State of the shipment of any consignment of silver, or in some cases on the delivery of the silver in the Mints in India. The purchased silver is thus treated as a part of the Currency Reserve and is described in the Currency accounts as 'Silver bullion in transit or under coinage', as the case may be. In the latter case, when the silver is taken up in the Mints for coinage purposes, the following adjustments are also made in the Indian Treasury Accounts. The purchase price of silver is credited to the head (1) 'Currency Silver in process of Coinage' (a sub-head of Section P.—Deposits and Advances—Coinage Accounts) to correspond with the debit under the same head in the Currency accounts, and the outturn value of the silver is debited to the head (2) 'Bullion Advances for Coinage' (also a sub-head under 'Coinage Accounts'), the difference between the outturn value, and the invoice value of the silver being simultaneously credited or debited to the head "Profit on Rupee Coinage" (also a sub-head under 'Coinage Accounts'), according as there is a gain or loss on the consignment of silver. As the coinage proceeds and rupees are made over to the Currency Reserve in replacement of the value received therefrom, the adjustment in the Treasury accounts in the case of (1) and (2) is reversed. If there is a profit on the consignment, the repayment to the Currency Reserve is completed and the head "Currency Silver in process of Coinage" is cleared before the debit balance under "Bullion advances for coinage" is fully wiped out. The outstanding balance under the latter head is adjusted when the surplus rupees coined are made over to Treasury. The head "Profit on Rupee Coinage" is also debited with all the charges incidental to the purchase of silver and coinage, such as freight, insurance, etc., as well as fixed seigniorage of 2 per cent. on the outturn of rupees for the cost of mintage, which is credited as a Mint receipt (see Account No. 63). The net profit thus deduced is transferred to the Deposit head "Gold Standard Reserve" by debit to "Profit on Rupee Coinage" (see also Account No. 92). If there is a loss on the consignment on account of the high price of silver, the rupee outturn falls short of the value transferred from Currency Reserve to Treasury and the deficiency, representing loss on coinage, is made good by cash payment from Treasury to Currency, the debit in the Treasury account being taken against "Currency Silver in process of Coinage" and the head thus fully cleared. The debit balance under "Profit on Rupee Coinage", together with incidental charges debited to this head as mentioned above, is finally transferred to "Exchange on Remittance Account".

There were no transactions under this head in the accounts for 1929-30, as no coinage of new silver was undertaken during that year.

92B.—ACCOUNT of RECEIPTS and PAYMENTS and the BALANCE of the GOLD STANDARD RESERVE—REVENUE EQUALISATION FUND for the year ended 31st March 1930.

The interest derived from investment of the Gold Standard Reserve, after the assets of the Reserve have reached £40 millions, has hitherto been credited to Revenue under "XVI—Interest". The fluctuations which occurred under this procedure in the amount credited to revenue in the past have been of so wide a nature as to be embarrassing to the budgetary position and to create a misleading impression as to the general revenues of the Government of India. It has therefore been decided to treat £1,600,000 on account of these receipts as the standard figure to be taken to the revenue account of each year. If, in any year, the actual receipts exceed this sum, one half of the surplus will be transferred to the Gold Standard Reserve—Revenue Equalisation Fund, which fund will be available to be drawn upon to make the receipts up to the standard figure of £1,600,000 in any subsequent year in which they fall below that level. This arrangement has been brought in force from 1930-31.

Out of the total interest receipts realised from investments of the Gold Standard Reserve during 1929-30, a sum of £2,300,000 has been credited to Revenue, the excess, namely, £442,709 being transferred to the credit of the Revenue Equalisation Fund as a starting balance.

Balance on 1st April 1929.	Transactions during 1929-30.		Balance, 31st March 1930.
	Appropriated from Gold Standard Reserve (See Account No 92) and other receipts.	Withdrawal from the Fund to make the credit to revenue up to the Standard figure of £1,600,000.	
£	£	£	£
...	442 709	...	(a) 442,709

(a) Of this £448,545 represents investments in British Treasury Bills.

No. 93.—ACCOUNT showing RECEIPTS, PAYMENTS, and BALANCES of DEPARTMENTAL, JUDICIAL and other DEPOSITS, for the year ended 31st March 1930.

The transactions brought to account under this head relate mainly to deposits received from the public in the course of Government business, such as deposits made in revenue courts in connection with revenue administration, deposits in civil or criminal courts, deposits for work done by Government for public bodies, etc. The Deposits of Reserve Fund and Depreciation Reserve Funds of certain Government Commercial Departments and Undertakings have, however, been shown under this head for the sake of convenience.

	Balance, 1st April 1929.	Receipts in 1929-30.	TOTAL.	Payments in 1929-30.	Balance, 31st March 1930.

N. to W.—Debt, Deposits and Advances.

Gain or loss on revaluation, sale, transfer, etc., of assets of the Paper Currency Reserve.

This Central Ledger head was opened in the accounts for 1927-28, for the adjustment of the various items of gain and loss arising out of the reconstruction of the Paper Currency Reserve. On the 1st April 1927, the gold and sterling securities held in the Paper Currency Reserve were revalued at the rate of Rs. 13½ to the pound sterling, in accordance with the provisions of the Indian Paper Currency Act, 1927, which came into force on that date. On the analogy of the procedure adopted in 1920, when the loss on revaluation of the gold and sterling assets of the Paper Currency Reserve was debited to a suspense head "Adjustment of Exchange on revaluation of gold and sterling securities in the Paper Currency Reserve", the gain from revaluation on the 1st April 1927 was credited to this suspense head, which has been debited with the loss on the realisation of rupee securities in the Paper Currency Reserve and also with the loss arising on the sale of Currency Reserve silver. The question of final adjustment of the items outstanding under this head is under consideration.

No. 93-A—ACCOUNT of GAIN or LOSS on REVALUATION, SALE, TRANSFER, etc., of ASSETS of the PAPER CURRENCY RESERVE during the year ended 31st March 1930.

Exchange on Remittance Accounts.

From the 1st April 1920 to the 31st March 1927, the accounts were prepared on the basis of the rate of 2s. per rupee for the conversion of English sterling transactions into rupees. The sterling value of the rupee stood, however, at a lower level in the latter part of this period, and in consequence large sums were brought to account as credits and debits on account of exchange in respect of transactions involving remittance of funds to and from England. Since the 1st April 1927, the accounts are being prepared on the basis of the new statutory rate of 1s. 6d. to the rupee, and as the average rates of exchange since April 1927 have not differed materially from the rate of 1s. 6d. the gains and losses adjusted in the accounts since 1927-28 have been comparatively small.

2. The present procedure for the allocation between different heads of exchange gains or losses is as follows. All exchange arising in respect of remittance transactions with England is brought to account in the first instance under the Deposit head "Exchange on Remittance Accounts", (see Account No. 94). Adjustments are then made, both in the Central and Provincial Accounts, transferring the exchange in respect of receipts and expenditure in England to the Major heads, Revenue and Capital, under which the transactions in England occur. These adjustments are made monthly, the calculations being based on the average of the Calcutta daily market rate for telegraphic transfers on London, which is taken as the standard for effecting remittances to England to meet expenditure in that country. The effect of this procedure is that the adjustments on account of exchange in respect of the revenue and expenditure of non-commercial services, which were up to the year 1920-21 shown in lump under the revenue or expenditure head 'XXIX or 40—Exchange', are now distributed over the respective heads of revenue and expenditure. (See Accounts Nos. 2, 3, 5 and 6).

3. The entire procedure outlined above requires reconsideration as a result of the fixation of exchange at 1s. 6d. the rupee with effect from the 1st April 1927, and the question of its revision and of the disposal of the eventual balance under this head is under the consideration of the Government of India. Pending a decision, the old procedure has been followed also in the accounts for 1929-30.

Revenue Reserve Fund.

The Government of the Punjab transferred Rs. 20 lakhs from its Revenue account of 1926-27 to a Revenue Reserve Fund, with a subsequent retransfer of Rs. 10 lakhs from the Fund to the Revenue account, leaving a balance of Rs. 10 lakhs in the Fund. A further sum of Rs. 15 lakhs was transferred to the Fund from the Revenue Account of 1927-28. The original intention of the Punjab Government in instituting this Fund was to put aside year after year a substantial amount in the Revenue section of the account until a sufficient sum had been accumulated in the Fund to insure against an unexpected shortage or failure of revenue owing to seasonal or other calamities by creating an actual Reserve Fund out of the current revenue. The Local Government have since agreed to create an invisible fund for the redemption of debt, designed not to be drawn upon but to provide security for borrowing to meet expenditure on the revenue account. The cardinal feature of this plan is that when there has been a true surplus in the revenue account, after excluding the extraordinary receipts of the Local Government on the one side, and capital expenditure met therefrom on the other, it shall be open to the Local Government to make special appropriations to the redemption of debt or to the acquisition of suitable Government Securities. The separate Fund has therefore been abolished and the question of the adjustment of the outstanding balance at credit of the fund is under consideration.

A portion of the Reserve Fund of the Punjab Government has been temporarily invested in that Government's own bonds, and the interest accruing on this investment has been created to the fund.

Section Q.—Loans and Advances by the Central Government.

The loans and advances brought to account in this section were formerly confined solely to transactions with the public. Since 1925-26 the scope of the section has been expanded by the inclusion of interest-bearing advances to Government servants for house-building and purchase of conveyances, which were formerly recorded under 'Advances Repayable', and also of advances by the Government of India to the Provincial Loans Fund. Advances made by the Government of India to the Shan States Federation are also brought to account under this head.

The rate of interest charged on advances to Government servants has been fixed for the present at 5 per cent., while the rate charged on loans and advances to Indian States, public bodies and persons, etc., is normally 6 per cent., though it is occasionally varied for special reasons. The rate of interest charged by the Government of India to the Provincial Loans Fund is determined with reference to the cost of new borrowings to the Government of India from time to time. Loans and advances made by Provincial Governments to public bodies and private persons and met from Provincial Revenues are recorded in 'Section R—Loans and Advances by Provincial Governments'.

No. 95.—ACCOUNT of LOANS and ADVANCES by the CENTRAL GOVERNMENT, showing the amounts ADVANCED and REPAYD during the year ended 31st March 1930, and the Balances of such LOANS, etc., at the COMMENCEMENT and CLOSE of the year.

(b) Taken in reduction of charges under "19—Interest on Ordinary Debt" (See Account No. 42-A).

N. to W.—Debt, Deposits and Advances.

Section R.—Loans and Advances by Provincial Governments.

The Provincial Advance and Loan Account had its origin in 1888-89. The account as it was then constituted was a double account, (1) between the Central and the Provincial Governments, and (2) between the Provincial Government and the local body or other borrower. The funds from which these loans and advances were made by the Provincial Governments were treated as being provided by the Government of India from their balances. The Provincial Governments were charged interest at rates varying from $3\frac{1}{2}$ to $5\frac{1}{2}$ per cent. on the mean outstanding balances of loans at the beginning and the end of each year, while the interest actually received from the borrowers was credited to Provincial Revenues, any writes off of irrecoverable loans and advances being also charged to them.

2. With effect from the 1st April 1921, the entire responsibility for the financing of the Provincial Loan Account has been transferred to the Local Governments, the balances outstanding on this account on the 31st March 1921 being treated as assets of the Provincial Governments concerned. Such of the moneys relating to the old Provincial Loan Account as were not repaid out of Provincial balances before the 1st of April 1921 were treated as advances made by the Central to the Provincial Governments (see Account No. 86-A). These advances carry interest at rates calculated on the average rates carried by the total amounts owed on this account by different Governments, and are ordinarily repayable in annual instalments before the expiry of twelve years counting from 1921-22.

3. As explained in the note on Famine (page 466), all loans to cultivators from the new Famine Relief Fund are, with effect from the year 1928-29, made through the Provincial Loan Account by means of repayable advances from the fund.

96.—ACCOUNT of LOANS and ADVANCES by PROVINCIAL GOVERNMENTS, showing the amounts ADVANCED and REPAYED during the year ended 31st March 1930, and the Balances of such LOANS, etc., at the commencement and close of the year.

	Amount, 1st April 1929.	Amount Advanced.	TOTAL.	Amount Repaid.	Amount, 31st March 1930.	Amount of Interest received and credited to Revenue (See Account No. 44).

N. to W.—Debt, Deposits and Advances.

Remittances between India and England.

The transactions brought under this Remittance head fall into three classes :—

(1) Transactions put through by the agency of Government on behalf of third parties, chiefly His Majesty's Imperial Government, involving cash recoveries from or cash payments to them against corresponding payments or receipts in India on their behalf, such as recoverable expenditure incurred in India on account of the War Office or the Admiralty, and expenditure incurred in England on behalf of Local Funds, Indian States, etc.

(2) Transactions which require final adjustment in the Indian Accounts. Such transactions mostly appear in the High Commissioner's accounts. With the gradual extension of the functions of the High Commissioner as agent to the Government of India, the number of transactions of this nature in the Secretary of State's accounts is gradually diminishing.

(3) Cash remittances from India to England and *vice versa* of funds belonging to India. Under this class come.

(a) Sterling purchased in India.

(b) Sterling sold in India.

(c) Sterling taken over in London.

(d) Transfers through the Paper Currency Reserve, and

(e) Transfers through the Gold Standard Reserve.

Items (a) and (b) of class (3) have been fully explained in the note to Account No 98. Item (c) represents the proceeds of sterling loans raised in the London market by local authorities, etc., taken over by the Secretary of State against corresponding payments by the Government of India in India at the prevailing rate of exchange. The last two items represent, as the heads indicate, a transfer of funds from the Treasury balances to the Reserves in India or England against a corresponding withdrawal from the Reserves to the Treasury in England or India.

The details of transactions falling under classes (1) and (2) above are given in Account No. 97. The various descriptive heads under which these transactions are shown indicate their nature.

Purchases and Sales of Sterling.

The requirements of the Home Treasury for payments of interest on debt, of leave salaries and pensions, for purchase of stores for India, etc., which were previously met by the sale of what were familiarly called 'Council Bills' or 'Councils' by the Secretary of State in London, are now met by the purchase of sterling by the Government of India in India from banks and firms on an approved list. These banks and firms arrange with their London agents by cable for the payment of the sterling sold to Government to the Imperial Bank of India in London for credit to the account of the Secretary of State at the Bank of England. The rupee payments made by the Government are met from their treasury balances with the Imperial Bank of India.

At times it may be necessary for the Government of India to replenish the treasury balances by transfers from the Paper Currency Reserve or the Gold Standard Reserve or to effect sales direct against these reserves. When this happens, the necessary adjustments as between the Treasury and the Paper Currency or the Gold Standard Reserve Accounts are effected in England.

Similarly, when sterling is sold to banks and firms in India in order to prevent exchange from falling below the lower gold point, the sale proceeds may be credited directly to the treasury balance or to the Paper Currency Reserve or the Gold Standard Reserve, as the case may be. The necessary payments of sterling in London against these sales are made from the source to which the sale proceeds have been credited in India. There were no sales of sterling during 1929-30.

	Amount of Sterling not realised by Secretary of State.	Rupess paid therefor.	Amount of Sterling.	Rupess paid therefor.	Amount of Sterling.	Rupess paid therefor.	Amount of Sterling not realised by Secretary of State.	Rupess paid therefor.
